### GDP per capita by statistical regions

In 2020 the level of GDP per capita according to Statistical Region Level 1 (Albania), is about 579 thousand ALL. Compared to year 2019 GDP per capita in nominal terms decreased by -2.27 %.

**Fig.2 GDP per Capita by Statistical Region Level 3 in 2020 (000/ALL)**

\*2020 Semi-final data

According to the estimation of GDP per capita by Statistical Region Level 2, in North Region is about 465 thousand ALL decreasing by -3.37 % compared with 2019. GDP per capita for this region is 19.76 % below the national average.

In the Statistical Region Centre GDP per capita is about 695 thousand ALL decreasing by -2.30 % compared with 2019. GDP per capita for this region is 20.05 % above the national average.

In the Statistical Region South GDP per capita is about 527 thousand ALL decreasing by -1.72 % compared with 2019. GDP per capita for this region is 9.04 % below the national average.

According to the estimation of GDP per capita by Statistical Region Level 3, the highest level is in Prefecture Tiranë with about 777 thousand ALL decreasing in nominal terms by -3.23 % compared with 2019. GDP per capita in Prefecture Tiranë is 34.14 % above the national average. It is followed by Prefecture Fier with about 619 thousand ALL decreasing in nominal terms by -4.01 % compared with 2019. GDP per capita in Prefecture Fier is 6.81 % above the national average.

The lowest level of GDP per capita by Statistical Region Level 3 for 2020 is in Prefecture Kukës with about 365 thousand ALL increasing in nominal terms by +1.27 %, compared with 2019. GDP per capita for Prefecture Kukës is 37.07 % below the national average. It is followed by Prefecture Lezhë with about 413 thousand ALL decreasing by -3.99 % compared with 2019. GDP per capita for Prefecture Lezhë is 28.79 % below the national average,

# Methodology

This Publication presents the Regional Accounts Result of GDP for 2020 in Albania expressed in Statistical Region Level 1, 2 and 3, following the requirements of - Nomenclature of Territorial Measuring Units for Statistics (NUTS) of the European Union and by classification of economic activities NACE Rev 2.0.

National Regional Accounts are based on the ESA 2010 methodology, mainly in Chapter 13, based in the most recent evaluation of Annual National Accounts, published on 30 April 2022, in order to preserve the consistency of these indicators.

More detailed information about the Regional National Accounts (2015-2020) on the regional indicators can be found in the link below:

<http://instat.gov.al/al/temat/ekonomi-dhe-financ%C3%AB/llogarit%C3%AB-rajonale-n%C3%AB-shqip%C3%ABri/#tab2>

## Classification and Methodology

Calculations of regional indicators are methodologically based on concepts and definitions of European System of Accounts (ESA 2010) and System of National Accounts (SNA 2008). Both these methodologies are the latest updates of ESA 1995 and SNA 1993. The European System of National Accounts and Regional Accounts is the framework for the measurement of economic and financial activities of the economic system, their components and the connection between them for a given period of time (usually one year). Transactions made by the economic agents related to other resident or non-resident units in an economic territory are object of measurements in Regional National Accounts. Classification changes are made to make regional economic indicators more useful to the users, to have a clearer view of the economic developments of specific regions and to improve the comparability between regions and EU member states information based on the Nomenclature of Territorial Measuring Units for Statistics (NUTS) of the European Union.

## Residence Principle

The main principle for allocation GVA in Regional Accounts is that GVA should be allocated to the region where the producer unit is resident, it means that GVA have to be allocated to region where is created.

Changes in the methodology and estimation of annual National Accounts were reflected in the estimation of Regional Accounts. INSTAT has made qualitative changes to the estimation method of GVA s for the distribution by economic activities of institutional units that are uni-regional or multi-regional.

Regarding the methodology used for the Regional Accounts please consult the methodological material: "Albanian Regional Account Methodology" in the address:

<http://www.instat.gov.al/media/4638/part-e-regional-accounts-albania.pdf>

The classifications used in the Regional Accounts are as follow:

- Nomenclature of Economic Activities Revision 2 (NACE Rev.2).
- Nomenclature of Territorial Measuring Units for Statistics (NUTS).

**The Nomenclature of Territorial Measuring Units for Statistics (NUTS)** is a uniform classification and is used as a base for collection and processing of European regional statistics.

**Purchasing Power Standard (PPS)** is an artificial currency unit that takes into consideration differences in national price levels. This unit allows meaningful volume comparisons of economic indicators for countries. Aggregates expressed in PPS are calculated by dividing aggregates (indicators) at current prices with national currency respectively Purchasing Power Parity (PPP). The volume index of GDP per capita expressed in Purchasing Power Standard (PPS) is given in relation to the average of the European Union (EU\_27 = 100).

Please note that the index expressed in PPS is intended for cross-country comparisons rather than for temporal comparisons. For further information on the PPS coefficients follow the address: [https://ec.europa.eu/eurostat/databrowser/view/prc\\_ppp\\_ind/default/table?lang=en](https://ec.europa.eu/eurostat/databrowser/view/prc_ppp_ind/default/table?lang=en).
