

Producer price Index

First quarter , 2017

Tirana, 05 June 2017: In the first quarter 2017, Producer Price Index increased by 101.7 compared with base year 2010. (2010 = 100).

The index signed an increase by 5.1 % compared with the same period of 2016 and 1.8 % compared with fourth quarter 2016.

Fig.1 Monthly Producer Price Index , January 2016 – March 2017

The annual change of index is 5.1 %. Highest prices are signed in products produced in “Mining and quarrying” section by 24.3 %. Here we can mention the increase price of products in manufacture of extraction of crude petroleum and natural gas products 37.3 %.

Producer prices on activities of “Manufacture” section, increased by 2.6%. Here we can mention the increase prices of products in metallurgy by 13.9 %, manufacture of tobacco products by 6.3 %, manufacture of chemical products by 3.8%.

05/06/2017

Continue

Producer prices for domestic market signed an increase by 2.8% compared with the same period of 2016.

Annual change of **export producer prices** in first quarter 2017 is 10.6 %.

Quarterly change of index is 1.8 %. Producer Prices in "Mining and quarrying" increased by 10.3 %. Highest prices are recorded on extraction of crude petroleum and natural gas products, by 15.3 %.

Producer Price Index in "Manufacturing" section increased by 1.3 % compared with the previous quarter. Here we can mention the increase price of metallurgy by 3.5%, manufacture of dressing by 0.6%, manufacture of food products by 0.3 %.

Producer Price Index for Domestic market reached 101.7 compared with base year 2010. (2010 = 100), signing an increase by 2.3 % compared with fourth quarter 2016. Highest prices are recorded in "Mining and quarrying" section by 4.7 % and "Manufacturing" section by 0.8 %.

Export Price Index reached 106.1 signing an increase by 3.2 % compared with the previous quarter. Here we can mention the increase of export price products in sections: "Mining and quarrying" and "Manufacturing" by 12.3 % and 1.9 % respectively. The prices of products in activities of collection, treatment and disposal of waste, materials recovery, decreased by 0.3%.

Metodology

User information

Producer price index measures the change in the prices of products at the first point of sale after production. Producer Price Index is compatible with Eurostat methodology and covers following economic activities:

- Extracting industry. B
- Manufacturing industry. C
- Electric power, water and gas. D
- Water supply, treatment activities and waste management

INSTAT calculates Producer Price Index for Domestic Production and Export Price Index. Calculation and publication of Producer Price Index in Albania include:

- Producer Price Index in Total
- Producer Price Index for Domestic Production
- Export Price Index

These indices are calculated for each product classified according to the Classification of Products by Economic Activity (CPA) in 6 – digit level and are published in two digit level. Renovation of the basket of enterprises and products is based on the results of Annual Structural Survey of Enterprises. For calculation of products' weights of Producer Price Index for Domestic Production are used data coming from SBS while for calculation of products' weights of Export Price Index are used data coming from Foreign Trade Statistics.

Producer Price Index (PPI) is calculated taking into consideration 2010 as base year (2010 = 100). Calculation's method used in compiling of this index is Laspayer chain – index. It means that each transaction will be compared with its previous year December price (y -1).

Index calculation

For calculation of index is used Laspeyer type and is calculated as following:

$$I_{2010}^{y,m} = \frac{100}{\frac{1}{12} \sum_{M=JAN}^{DEC} I_{2010Dec}^{2010M}} \times \prod_{Y=2010}^{y-1} I_{Y-1,dec}^{Y,dec} \times I_{y-1,dec}^{y,m}$$

- The first part before the equal sign is stating the price level of December 2009 in percent of the average price level during 2010. hence adjusting the average of 2010 to 100.
- The second term is the chained index movement from December 2010 to December y-1 (a product of yearly index links [short-term - links] from December to December).
- The last part is showing the movement from December y-1 to month m year y.

Measures of index

The annual change measures the price change between the current quarter and the same quarter of previous year. This measures is responsive to recent changes in price levels but can be influenced by one – off effects in either quarter.

Quarterly change measures the price changes between current quarter and previous quarter.
