Preface

This Publication presents the Regional Accounts Result of GDP for 2013 in Albania expressed in Statistical Region Level 1, 2 and 3 (following the requirements of - Nomenclature of Territorial Measuring Units for Statistics (NUTS) of the European Union), and also by branches of economy following NACE Rev 2 nomenclature, by revising the full annual time series 2008-2013, taking into account the last estimation of Annual National Accounts 30 May 2015, and also based on Annual and Regional methodology to have more consistent estimations of these macroeconomic indicators.

The Nomenclature of Territorial Measuring Units for Statistics (NUTS) is a uniform classification, and is used as a base for collection and processing of European regional statistics. Regional statistics are the foundation of the European Statistical System. They are used for different purposes. NUTS classification by the European Union is implemented as a standardized breakdown in purpose of:

- i) Collection, development and harmonization of statistics at regional level;
- ii) Socio-economic analysis of the regions;
- iii) For allocation of structural funds for development;

The production of additional economic regional statistics is followed by important decisions in national level and for European Union Regional Policy in the process of allocating structural funds. Regional Development of regions is linked with attracting investments based on the decision making process from available Regional Accounts Data. The statistical information in this publication is supplemented by set of definitions and basic concepts used in National and Regional Accounts as well as maps and graphs reflecting regionalization of selected macroeconomic categories. Detailed information on the level of economic development in regions and prefectures will be helpful in economic analyses and for monitoring changes in the structure in context of regions.

INSTAT has revised all time series for the years 2008-2013 of Annual National Accounts Indicators, which were published on 30/May/2015 and have also provided a full methodological manual on these revisions.

These methodological changes were reflected in the new Revision for Regional Accounts, in data sources and also in methodology revision. This publication contains results of calculations of Gross Domestic Product and its components for the years 2008-2013 according statistical regions level 2 and 12 statistical regions level 3 harmonized with statistical breakdown of Territorial Measuring Units for Statistics (NUTS).

For the user, data are expressed in euro, dollars and in PPS (Power Purchaser Standard) for international comparisons effects.

1. Breakdown of territory for Republic of Albania by Statistical Regions

On 28-th April 2011 EUROSTAT confirmed INSTAT proposal, approved by Council of Ministers², for regional breakdown of Albania in 3 statistical regions level 2 and 12 statistical regions level 3, corresponding existing prefectures. The composition of statistical regions is presented in the following table:

Regional structure in Albania according NUTS

Statistical Region Level 1	Statistical Region Level 2	Statistical Region Level 3
The Republic of Albania	North	Dibër
		Durrës
		Kukës
		Lezhë
		Shkodër
	Center	Elbasan
		Tiranë
		Berat
	South	Fier
		Gjirokastër
		Korçë
		Vlorë

The breakdown of the Albania territory is in coherence with Regulation (EC) No 1059/2003 of the European Parliament and of the Council of 26 May 2003 on the establishment of a common classification of territorial Measuring Units for statistics (NUTS).

Number of population for each non-administrative unit at level NUTS 2 is harmonised with thresholds in Regulation of European Commission arranged minimum size 800 thousand people and maximum 3 million inhabitants.

Regions at level 3 are Administrative Measuring Units (Prefecture). Average number of population for level 3 is 241,447 inhabitants in year 2013 within interval from 150 to 800 thousand of inhabitants.

NUTS	Minimal number of residents	Maximal number of residents
NUTS 1	3.000.000	7.000.000
NUTS 2	800.000	3.000.000
NUTS 3	150.000	800.000

2. Regional Accounts in Albania 2013

The estimation of Regional Accounts in Albania is based on Annual National Accounts Concepts. This is the fifth release of Regional Accounts in Albania and compiled in accordance with guidelines set out in ESA Chapter 13- Regional Accounts. The regional indicators cover years 2008-2013 published at statistical 2 and 3 levels main branches of the economy.

² Decision of C.M no. 1037 date 15.12.2010 "On the implementation of the nomenclature" "Albania in 3 (three) regions NUTS II" according to the Nomenclature of the Territorial Units on statistics (NUTS) of the European Union.

The publication contains indicators of Gross Value Added (GVA) and Gross Domestic Product (GDP) with current and constant prices for years 2008-2013. Regional macroeconomic estimates are available for 3 Statistical Regions Level 2 regions and 12 Statistical Regions Level 3 called prefectures. Estimates are consistent with EUROSTAT recommendations.

2.1 GDP by Statistical Regions level 2 and 3

In year 2013, according statistical regions level 1 (Republic of Albania), GDP at current prices was 1,350.6 billion Lek and has increase by 1.11 % compared to year 2012.

In year 2013 according statistical regions level 2, in Central region, GDP at current prices was 608.4 billion Lek or 45.1 % of the total GDP of the country. Compared to year 2012 GDP at current prices has increased by 1.6 %.

GDP at current prices in South Region was 422.3 billion Lek or 31.3 % of total of the country. Compared to year 2012 GDP at current prices has increased by 1.2 %. GDP at current prices in North Region was 319.8 billion Lek or 23.7 % of total GDP. Compared to year 2012 GDP at current prices has increased by 0.1 %.

According to statistical regions level 3 (Prefecture) the lowest value of GDP was in prefecture Kukës with 31 billion Lek or 2.3 % of total GDP. Compared to year 2012 GDP at current prices has increased by 5.6 %.

The highest value in GDP was in prefecture Tiranë with around 507 billion Lek or 37.6 % of total GDP. Compared to year 2012, GDP at current prices increased by 1.0 %

In the table below are presented some of the main results of National Regional Accounts in Albania.

In Appendix A.2 there is the map of the distribution of GDP by statistical regions level 3.

GDP at current prices, per capita year 2013* by Statistical Regions Level 2/3

*Estimations for year 2013 are based on semi-finale estimations

2.2 Contribution to real Growth Rate of GDP for 2013 by Prefecture

In 2013 according to the Statistical Region Level 1 (Albania) GDP at current prices was 1,350,6 billion Lek and has increase by 1.11 % compared to the year 2012. The contribution to the real growth rate of GDP for the Statistical Region Level 1 (Albania) for the year 2013 compared with 2012 by Statistical Region Level 3 (Prefecture) are presented below: The highest contribution to the real growth rate for 2013 was in Prefecture Fier with +0.49 p.p. It was followed by Prefecture Tirana with a contribution to the real growth rate of +0.36 p.p and Prefecture Elbasan with a contribution to the real growth rate of 0.35 p.p. The lowest contribution to the real growth was in Prefecture Shkodër with -0.19 p.p. It was followed by Prefecture Lezhë with a contribution to the real growth rate of -0.14 p.p and Prefecture Vlorë with a contribution to the real growth of -0.09 p.p.

Fig.1 Prefectures Contribution to real Growth Rate of GDP for 2013

2.3 Growth Rates of Gross Domestic Product by Statistical Region

Gross Domestic Products in 2013, in comparison to 2012, grew by 1.11 % at current prices.

In 2013 according to the Statistical Region Level 2, GDP at current prices in Statistical Region Center was 608.4 billion Lek and it constitutes 45.1 % of the total GDP. Compared with 2012, Statistical Region Center GDP in real terms has increased by 1.6 %. GDP at current prices in Statistical Region South was 422,3 billion Lek and it constituted 31.3 % of the total GDP. Compared with 2012, Statistical Region South GDP in real terms has increased by 1.2 %. GDP at current prices in Statistical Region North was 319,8 billion Lek and it constituted 23.6% of the total GDP. Compared with 2012, Statistical Region North GDP in real terms has increased by 0.1 %

Compared with 2012 the structure of GDP by prefecture has not been subject to major changes as it can be seen in Tab.1.

In 2013 according to the Statistical Region Level 3 (Prefecture) the highest growth rate was registered in Prefecture Kukës where GDP in real terms has increased by 5.6 %. It was followed by Prefecture Elbasan where GDP in real terms has increased by 4.8 % and by Prefecture Fier where GDP in real terms has increased by 3.8 %. In 2013 according to the Statistical Region Level 3 (Prefecture) the lowest growth rate was registered in Prefecture Lezhë where GDP in real terms has decreased by 4.4 %. It was followed by Prefecture Shkodër where GDP in real terms has decreased by 3.3 % and by Prefecture Gjirokastër where GDP in real terms has increased by 2.8 %.

The real GDP for year 2013 was subject to variation in the rates between Statistical Regions Level 3 (Prefecture). The rates, in particular year and in particular prefecture, depends on the contribution of the individual prefecture in the total GDP, the branch structure etc. By statistical regions level 3, in the table below are expressed the growth rates of respective statistical regions.

Growth rate of GDP

Prefectures	Growth rate of GDP				
	2009	2010	2011	2012	2013
Republic of Albania	3.4	3.7	2.5	1.4	1.1
Prefectures = 100					
Dibër	4.0	7.4	-1.6	12.9	-0.02
Durrës	2.9	11.3	-5.7	0.9	2.6
Kukës	4.3	3.8	5.9	-3.1	5.6
Lezhë	3.0	-1.8	1.7	6.6	-4.4
Shkodër	4.3	6.8	0.0	-2.4	-3.3
Elbasan	2.4	12.9	-1.1	-2.5	4.8
Tiranë	3.9	0.5	0.9	1.9	1.0
Berat	3.1	6.8	7.4	-7.6	0.5
Fier	1.6	6.7	13.9	7.6	3.8
Gjirokastër	3.3	4.6	19.0	7.5	-2.8
Korçë	3.4	1.5	3.2	1.5	0.4
Vlorë	3.2	-4.5	7.2	-6.3	-1.4

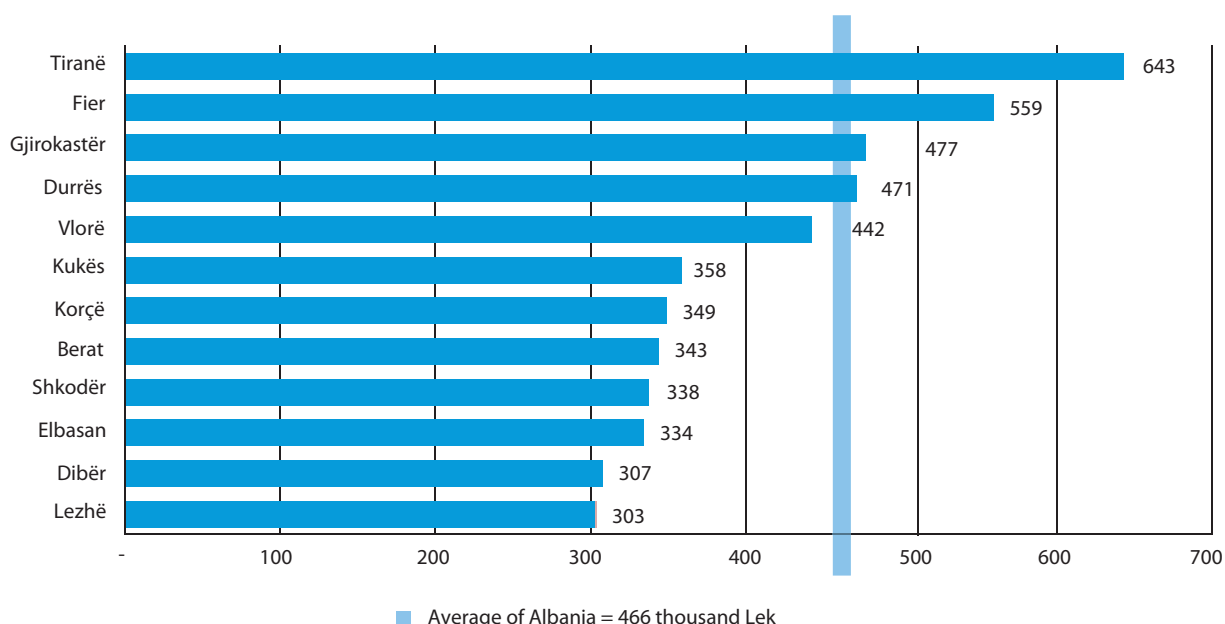

2.4 GDP per capita according statistical levels

In year 2013 the level of GDP per capita according to statistical region level 1 (Republic of Albania) was around 466 thousand Lek. Compared to year 2012 GDP per capita has increased by 1.44 %.

According statistical regions level 2, in Central region, GDP per capita in year 2013 was around 557 thousand Lek or 19.6 % above the national average. Compared with 2012 GDP per capita in Central region has increased by 1.7 %. In North region GDP per capita in year 2013, was around 372 thousand Lek or 20.2 % below the national average. Compared to year 2012, GDP per capita in North Region has increased by 0.4 %. In South region, GDP per capita in year 2013 was around 446 thousand Lek or 4.2 % below the national average. Compared to year 2012, GDP per capita in South region has increased by 1.8 %.

The highest level of GDP per capita in statistical regions level 3 (Prefectures) in year 2013 was in Tiranë with about 643 thousand Lek or 38.0 % above the national average and increased by 0.7 % compared to year 2012. After is ranked Prefecture Fier with around 559 thousand Lek or 19.9 % above the national average and increased by 4.4 % compared to year 2012. Then is ranked Prefecture Gjirokastër with about 477 thousand Lek or 2.3 % above the national average and increased by 2.2 % compared to year 2012. Then is ranked Prefecture Durrës with about 471 thousand Lek or 1.1 % above the national average and increased by 1.9 % compared to year 2012. GDP per capita for other prefectures was below the national average which was the lowest was in Prefecture Lezhë with about 303 thousand Lek or 35.0 % below the national average. Further, the lowest GDP per capita was in Prefecture Dibër, with around 307 thousand Lek or 34.1 % below the national average. GDP per capita in Prefecture Korçë was about 349 thousand Lek, or 25.18 % below the national average.

Fig.2. GDP per capita according statistical regions level 3 compared with the national average (000/Lek) in 2013

2.5 GDP per capita in PPS in Albania

For comparing the economic level of the EU countries the indicator of Purchasing Power Standard (PPS-Purchasing Power Standard) is used. This index is calculated by EUROSTAT according the deflators of respective countries. Purchasing Power Standard (PPS) is an artificial currency unit that takes into consideration differences in national price levels. This unit allows meaningful volume comparisons of economic indicators for countries. Aggregates expressed in PPS are calculated by dividing aggregates (indicators) at current prices with national currency respectively Purchasing Power Parity (PPP). The volume index of GDP per capita expressed in Purchasing Power Standard (PPS) is given in relation to the average of the European Union (EU28 = 100).

Republic of Albania's GDP expressed in Purchasing Power Standard (PPS) in year 2013 was 21,490 PPS or 28.9 % of the EU average EU28 = 100. According to statistical regions at level 2 in Central Region, GDP per capita in PPS in year 2013 was 34.5 %, while in the North and South was respectively 23.0 % and 27.6 %.

GDP of Albania expressed in Purchasing Power Standard

Statistical Region	GDP per capita in PPS (BE28=100) in 2013
The Republic of Albania	28.9
NUTS 2	
North	23.0
Center	34.5
South	27.6

Please note that the index expressed in PPS is intended for cross-country comparisons rather than for temporal comparisons. For further information on the PPS coefficients follow the address:
<http://ec.europa.eu/eurostat/web/purchasing-power-parities/data/database>

GDP per capita in EU year 2013

In 2013, GDP per capita, expressed in terms of purchasing power standards (PPS) in the EU28's 272 NUTS-2 regions ranged from 30 % of the EU28 average in the regions of Severozapaden in Bulgaria and Nord-Est. in Romania, to 325 % of the average in Inner London in the United Kingdom. The Regions are compared in NUTS 2 level. For further information follow the address below:

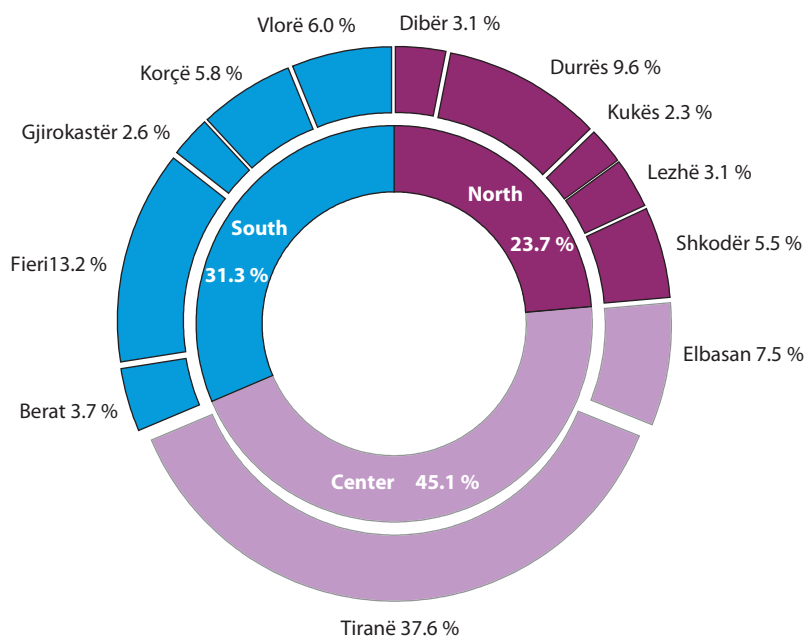

<http://ec.europa.eu/eurostat/web/purchasing-power-parities/data/database>
<http://ec.europa.eu/eurostat/documents/2995521/6839731/1-21052015-AP-EN.pdf/c3f5f43b-397c-40fd-a0a4-7e68e3bea8cd>

2.6 Share of GDP by statistical regions level 2/3 year 2013

In statistical regions level 3 the lowest share of GDP compared with the national level was in Prefecture Kukës and in Prefecture Gjirokastër at 2.3 % and 2.6 %. The largest share of GDP was in Tiranë with 37.6 %.

In 2013 the share of GDP for Center Region had 45.1 % of total of Albania. Share of GDP of region South was 31.3 % of total GDP. Share for region North was 23.6 % of total GDP.

Share of GDP by statistical regions level 2, 3 year 2013

2.7 Gross Value Added by branches and by prefectures

In 2013, **the share of agriculture, forestry and fishing** in the generation of the national Gross Value Added amounted to 22.5 %. The branch agriculture, forestry and fishing increased by 3.9 % more than in 2012.

In the individual statistical regions level 3, the shares of agriculture, forestry and fishing were ranged in 2013 from 5.0 % in the Prefecture Tiranë to 49.5 % in the Prefecture Berat. Most of the regions at statistical level 3 with the share of agriculture, forestry and fishing exceeded the national average. The prefectures with the share of agriculture, forestry and fishing in the generation of gross value added compared with the national average are presented in the table below:

Share by branches of economy

Statistical Region	Share of Agriculture, Forestry and Fishing in GVA				
	2009	2010	2011	2012	2013
Republic of Albania	19.41	20.66	20.96	21.66	22.50
Prefecture =100					
Dibër	36.98	38.41	39.92	45.81	46.41
Durrës	14.25	14.57	14.83	15.88	17.20
Kukës	28.90	31.48	39.11	34.19	34.56
Lezhë	28.18	32.51	30.56	35.23	36.89
Shkodër	30.05	30.75	27.93	31.56	34.49
Elbasan	28.14	30.17	35.24	39.40	39.73
Tiranë	4.12	4.58	4.76	4.83	5.02
Berat	40.40	40.56	44.13	45.74	49.49
Fier	39.75	40.52	33.46	33.33	33.51
Gjirokastër	34.28	33.66	33.07	28.81	29.86
Korçë	35.83	36.01	36.61	35.71	39.12
Vlorë	24.40	24.73	25.90	24.08	23.18

Branch of industry, include industry of mining and quarrying; manufacturing; electricity and water supply, generated 14.4 % of the national gross value added. The branch of industry increased by 8.5 % compared to 2012.

Based on statistical region level 3, the share of industry ranged from 6.9 % in Prefecture Gjirokaštër to 32.3 % in Prefecture Fier. Regions at statistical level 3 with the shares of industrial activities exceeding the national average were: Korçë, Fier, Durrës and Elbasan. The share of the generation of Gross Value Added for the branch of industry is presented in the table below:

Share by branches of economy

Statistical Region	Share of Industry of mining and quarrying, manufacturing, electricity and water supply in GVA				
	2009	2010	2011	2012	2013
Republic of Albania	10.93	13.82	13.53	13.31	14.44
Prefecture =100					
Dibër	21.18	22.40	16.34	14.26	16.22
Durrës	12.32	15.39	15.81	13.63	14.89
Kukës	13.79	13.30	5.52	8.71	11.05
Lezhë	7.87	10.95	10.59	12.51	10.74
Shkodër	15.59	15.06	11.25	11.87	13.99

Vlorë	8.49	12.24	10.42	11.22	13.02

Branch of construction generated 11.93 % of the national Gross Value Added. The branch of construction decreased by 9.3 % compare to 2012.

Based on statistical region level 3, the share of construction ranged from 5.4 % in Prefecture Dibër to 24.83 % in Prefecture Kukës. Regions at statistical level 3 with the shares of construction exceeding the national average were: Tiranë, Vlorë and Kukës. The prefectures with the share of construction in the generation of gross value added compared with the national average are presented in the table below:

Share by branches of economy

Statistical Region	Share of Construction in GVA				
	2009	2010	2011	2012	2013

2.8 Unique Position of Tirana in the Republic of Albania

The Albanian Capital Tirana among 12 administrative regions has a key position. Here are allocated the majority of government institutions and headquarters of the majority of multiregional³ companies.

In 2013, 27.07 percent of the population lived in Tirana with 38.2 percent of the national GDP. GDP per capita was 41.5 percent above the average.

Some of the main factors are:

- The concentration gross value added of construction branch
- The concentration of the services sector (banking, insurance, and telecommunications)
- High compensation of employees
- High rate of commuting from other prefectures⁴

2.9 Diversity of statistical regions

Statistical Regions in Albania North, Center and South have different demographic characteristics, industrial structure and economic performance.

Region North has 37.9 % of Albanian territory, the second largest area with a population of 29.68 % of the total.

Region Center has 16.9% of Albanian territory, but the largest percentage of population at 37.68 % of the total while region South has the largest area at 45.2 % with a population of 32.64 % of the total.

These variations in regional populations are reflected in the size of regional GVA and income. The wide variation in the size of the regions makes it difficult to compare the regional economic performance using absolute values. The diversity is measured by using terms of amounts per capita of population.

Economic growth may have variation from growth per capita in regions where population has increased or decreased. For detail see the table presented below:

³ Enterprises that have activities in more than one prefecture

⁴ Commuters - people who work in one area and live in another ex. Tirana and Durrës

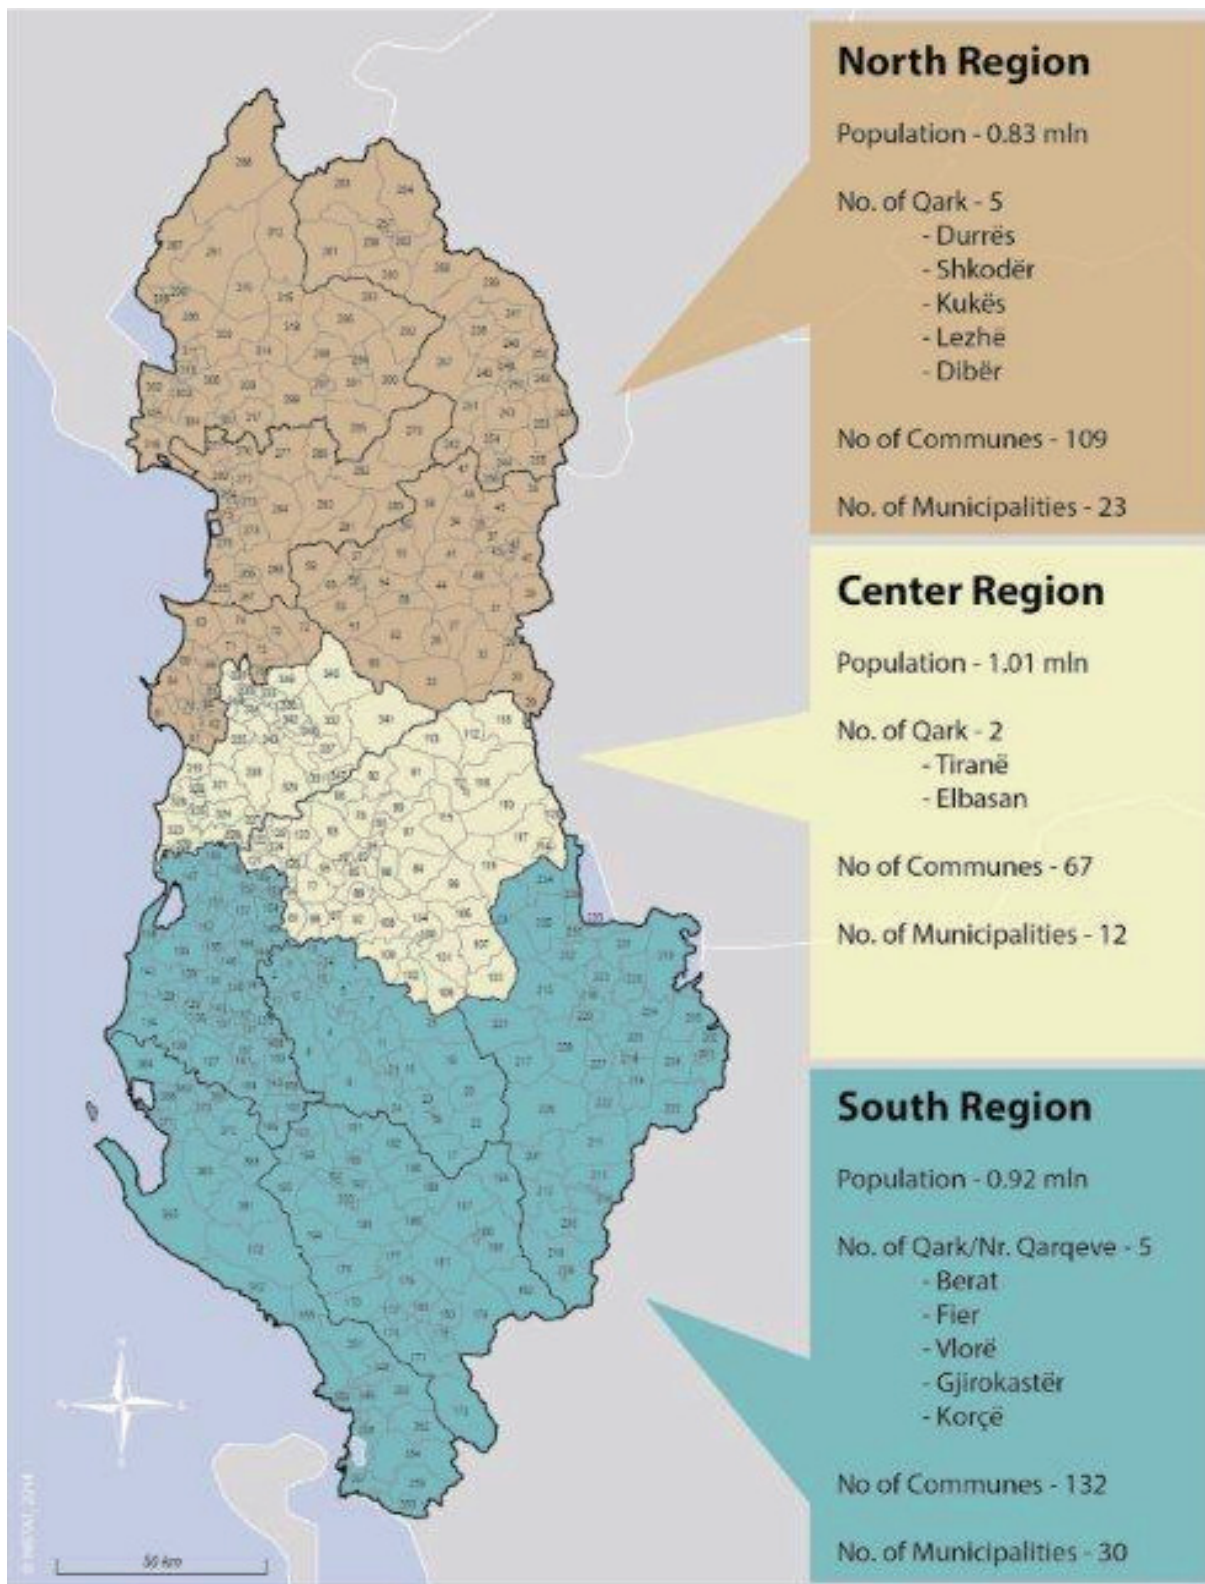

Regional Indicators year 2013

Statistical Regions		Surface km ²	Average population 2013 ⁵ nr.	Density of population Inhabitant/km ²
