

Import Price Index

Third quarter, 2020

Tirana, 04 December 2020: In third quarter 2020, Import Price Index reached 94.6 % signed an increase by 0.9 % comparing with third quarter 2019. Compare with second quarter 2020 Import Price Index increase by 0.3 %.

Fig. 1 Annual changes of Import Price Index by quarters

Annual change: The highest increase in import prices is noted in the products of the "Manufacturing" section by 1.3 %. In this activity can be mentioned the increased of import prices in "Manufacture of optics, electronics and computer products" by 5.3 %, followed by "Manufacture of pharmaceutical products and pharmaceutical preparation" by 4.1 %, "Manufacture of machinery and equipment" by 3.7 %, "Manufacture of leathers and leather products" by 3.6%, etc. And prices in "Metallurgy" activity decreased by 3.9 %, followed by "Manufacture of rubbers and plastic products" by 2.5%, "Paper printing and reproduction of recorded media" activity decreased by 1.8 %, etc.

Quarterly change: Import Price Index in the third quarter 2020 increased by 0.3 % comparing with second quarter 2020. Import Price Index in the third quarter 2020 in "Manufacturing" section which occupies the highest weight in the value of imports increased by 0.1 % compared with first quarter 2020.

Methodology

The industrial import price index, measures the changes of transaction prices of imported products to be traded in the domestic market.

INSTAT calculates and publish:

- Import Price Index
- Quaterly and anually chanches of the index.

Import Price Index covers the following economic activities:

Section B Mining and quarrying

Section C Manufacturing

Section D Electricity, gas and steam supply

Section E Water supply, sewerage and waste

Index calculation

The indices are calculated for each product classified according to the Classification of Products by Economic Activity (CPA 2008) in 6 – digit level and are published in two digit level.

Measures of index

The annual change measures the price change between the current quarter and the same quarter of previous year. This measures is responsive to recent changes in price levels but can be influenced by one –off effects in either quarter.

Quarterly change measures the price changes between current quarter and previous quarter.
