

Results on Industrial Production Survey - PRODCOM

Year 2022

Tiranë, September 28, 2023: INSTAT publishes for the first time the results on the Industrial Production Survey (PRODCOM) according to the Prodcom List detailed at an 8-digit level, which is used in the European Union countries. This survey is done with an annual frequency and covers all active enterprises which operate in mining and quarrying and manufacturing and aims to provide information on the production and sale of industrial products made by enterprises that carry out their economic activity in our country. These statistics serve to make analyses of industrial products produced in the country.

Production and sale of most important industrial products

During 2022 it is produced 902,064 tons of crude petroleum from 697,662 tons produced in 2021. The production of pig iron in 2022 reached the quantity of 808,983 tons from 773,668 tons produced in 2021. During 2022, it is produced 1,399,017 tons of chromium ores and concentrates from 1,068,729 tons produced in 2021.

Tab.1 Quantity and sales value of industrial products, 2021-2022

Procom List Code	Description of product	Measure unit	2021		2022	
			Actual production	Sales value (million ALL)	Actual production	Sales value (million ALL)
06101000	Crude petroleum	ton	697,662	34,225	902,064	44,893
24101100	Pig iron and iron in other primary forms	ton	773,668	31,343	808,983	32,695
07291910	Chromium ores and concentrates	ton	1,068,729	22,400	1,399,017	30,963
23631000	Ready-mixed concrete	ton	1,949,529	13,517	1,894,661	12,453
23511290	Other hydraulic cements	ton	1,302,353	10,260	1,205,369	9,700
15201352	Women's town footwear with leather uppers	pairs	12,740,636	5,348	13,260,891	7,414
10131460	Sausages and similar products of meat	ton	15,051	8,004	10,925	7,390
15201351	Men's town footwear with leather uppers	pairs	10,566,043	7,523	9,192,631	6,724
24422230	Aluminums bars, rods and profiles	ton	15,360	7,479	10,789	6,638
11071950	Non-alcoholic beverages	litre	102,479,465	5,639	113,444,465	6,384

Note: The amount of industrial products at 8-digit level do not necessarily represent all the amount of industrial products produced at economic activity 4-digit level.

The sales value for the crude petroleum during 2022 was 44,893 million ALL, from 34,225 million ALL in 2021, increasing by 31.2 %. The sales value for the pig iron and iron in other primary forms during 2022 was 32,695 million ALL, from 31,343 million ALL in 2021, decreasing by 4.3 % and the sales value for the chromium ores and concentrates during 2022 was 30,963 million ALL from 22,400 million ALL in 2021, increasing by 38.2 %.

Fig.1 Sales value of industrial products, 2021-2022

During 2022, metallurgy accounted for 14.7 % of the total sales value of industrial products, from 14.8 % in 2021. Manufacture of food products accounted for 11.5 % of total sales in 2022, from 11.8 % in 2021, while the extraction of crude petroleum accounted for 11.2% of total sales in 2022 from 9.8% in 2021.

The Figure 2 presents the sales value of industrial products, according to the divisions of Statistical Classification of Economic Activities Rev.2.

Fig.2. The sales value of industrial products, according to the division of economic activities

Division of economic activities according to NACE Rev.2

- 06 - Extraction of crude petroleum
- 07 - Mining of metal ores
- 08 - Other mining and quarrying
- 10 - Manufacture of food products
- 11 - Manufacture of beverages
- 12 - Manufacture of tobacco products
- 13 - Manufacture of textiles
- 14 - Manufacture of wearing apparel
- 15 - Manufacture of leather and related products
- 16 - Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials
- 17 - Manufacture of paper and paper products
- 18 - Printing and reproduction of recorded media
- 20 - Manufacture of chemicals and chemical products
- 21 - Manufacture of basic pharmaceutical products and pharmaceutical preparations
- 22 - Manufacture of rubber and plastic products
- 23 - Manufacture of other non-metallic mineral products
- 24 - Manufacture of basic metals
- 25 - Manufacture of fabricated metal products, except machinery and equipment
- 26 - Manufacture of computer, electronic and optical products
- 27 - Manufacture of electrical equipment
- 28 - Manufacture of machinery and equipment n.e.c.
- 29 - Manufacture of motor vehicles, trailers and semi-trailers
- 30 - Manufacture of other transport equipment
- 31 - Manufacture of furniture
- 32 - Other manufacturing
- 33 - Repair and installation of machinery and equipment

Methodology

The Industrial Production Survey (PRODCOM) is an annual survey, which purpose is to collect and produce statistics on the production and sale of industrial products carried out by enterprises in the Republic of Albania. The industrial product term refers to both products that have a physical dimension and industrial services.

PRODCOM survey covers all active enterprises which operate in Mining and quarrying and Manufacturing, respectively sections B and C of the Statistical Classification of Economic Activities in the European Union (NACE Rev. 2). This survey is based on a statistical classification (Prodcom List) containing about 3800 different types of products. The Prodcom list is detailed at the 8-digit level and is used in European Union countries. Industrial products at an 8-digit level do not necessarily represent all the amount of industrial products produced at economic activity level.

Structural business statistics are published according to the European Commission regulations:

- EU regulation 2019/2152 on European business statistics (EBS);
- EU implementing regulation 2020/1197 on technical specifications and arrangements for European business statistics;
- Classification of PRODCOM (Prodcom List) which is created through a separate Implementing Regulation.

Definitions of basic variables:

Actual production (in units of measurement as defined in the Prodcom List) refers to the production produced by the enterprise during the reference year.

Sold production (in units of measurement as defined in the Prodcom List) refers to the production produced by the enterprise during a certain period of time and sold during the reference year, regardless the time of production.

Sales Value refers to the invoiced amount from the sale of industrial products during the reference year, excluding value added tax.
