

Producer price Index

Third quarter, 2024

Tirana, on 05 December 2024: In the third quarter 2024, Producer Price Index reached 129.2 against 2021. Compared to the third quarter of 2023, the Producer Price Index increased by 1.1 %, a year ago this change was 5.2 %.

Producer Price Index in the second quarter 2024 decreased by 0.1 %, compared with second quarter 2024.

Fig.1 Producer Price Index

Annual change: Compared to the third quarter of 2023, the largest price increase of 3.1 % is observed in the sections "Mining and quarrying" and "Electricity, gas, steam and air conditioning", followed by section "Water supply, waste treatment and management activities" by 0.5 % and "Manufacturing" by 0.3 %. Within the section "Manufacturing", the largest increase in prices is observed in the activity "Manufacture of beverages" by 2.9 %, followed by the activities "Manufacture of food products" by 2.5 %, "Paper printing and regrouping of recorded media" by 2.2 %, "Manufacture of electrical equipment" by 2.2 %, etc. On the other hand, the biggest decrease in prices is observed in the activities "Manufacture of non-metallic mineral products" by 2.4 %, followed by the activities "Manufacture of textiles" by 1.2%, etc.

For publication 05/12/2024

Continue

The Index of Production Prices of products for the domestic market: Compared to the third quarter of 2023, the index increased by 1.6 %. The biggest increase in prices is observed in the section "Electricity, gas, steam and air conditioning" by 4.0 %, followed by the section " Manufacturing" by 0.8 %, " Mining and quarrying " and "Water supply, waste treatment and management activities" by 0.6 %.

Production Price Index of products for export: Compared to the third quarter of 2023, the index recorded an increase of 0.7 %. The largest increase in prices was recorded in the "Mining and quarrying" section by 5.4 % and section "Electricity, gas, steam and air conditioning" by 0.3 %. On the other side, the section "Water supply, waste treatment and management activities" decreased by 0.4 %, followed by the section "Manufacturing" by 0.1 %.

Quarterly change: Compared to the second quarter of 2024, the index decreased by 0.1 %. The biggest decrease is observed in the section " Manufacturing " by 0.2 %, followed by the section Mining and quarrying " section by 0.1 %. On the other side, the section " Water supply, waste treatment and management activities " increased by 0.2 %. In the section" Manufacturing " the largest decreased in prices is observed in "Manufacture of chemicals and chemical products" by 1.5 % followed by the section "Metallurgy" by 1.2 %, "Manufacture of non-metallic mineral products" by 0.9 % etc.

Index of Production Prices of products for the domestic market: Compared to the second quarter of 2024, the index increased by 0.1 %. The biggest increase is observed in the " Manufacturing " section by 0.3 %, followed by the sections " Water supply, waste treatment and management activities " by 0.2 %. On the other side, the section " Mining and quarrying " decreased by 0.7 %. The section "Electricity, gas, steam and air conditioning" has not changed.

The Index of Production Prices of products for export: Compared to the previous quarter, the index increased by 0.2 %. The biggest increased is observed in the section "Mining and quarrying" by 0.9 % followed by the section "Electricity, gas, steam and air conditioning" by 0.4 % and the section "Manufacturing" by 0.1 %. On the other side, the section " Water supply, waste treatment and management activities " decreased by 0.1 %.

Methodology

The Producer Price Index starting from the first quarter of 2024 will be calculated with the new base period. Year 2021 is considered as the base period for the index calculation (Year 2021=100)

INSTAT calculates Producer Price Index for Domestic Production and Export Price Index. Calculation and publication of Producer Price Index in Albania include:

- Producer Price Index in Total
- Producer Price Index for Domestic Production
- Export Price Index

Producer price index measures the change in the prices of products at the first point of sale after production. Producer Price Index is compatible with Eurostat methodology and covers following economic activities:

- Section B - Extracting industry
- Section C - Manufacturing industry
- Section D - Electric power, water and gas
- Section E - Water supply, treatment activities and waste management

These indices are calculated for each product classified according to the Classification of Products by Economic Activity (CPA) in 6 – digit level and are published in two digits level. Renovation of the basket of enterprises and products is based on the results of Annual Structural Survey of Enterprises. For calculation of products weights of Producer Price Index for Domestic Production are used data coming from SBS while for calculation of products" weights of Export Price Index are used data coming from Foreign Trade Statistics.

Producer Price Index (PPI) is calculated taking into consideration 2020 as base year (2020 = 100). Calculation's method used in compiling of this index is Laspayer chain – index. It means that each transaction will be compared with its previous year December price (y -1).

Index calculation

For calculation of index is used Laspayer type and is calculated as following:

$$I^{y.m}_{\text{current}} = \frac{100}{12 \sum_{Dec} I^{F.M}_{F-1.Dec}} + \frac{I^{y-1.F.M}_{F-1.Dec}}{I^{y-1.F.M}_{Baze\ year}} * I^{y.m}_{y-1.Dec}$$

- The first part before the equal sign is stating the price level of December previous year in percent of the average price level during base year. Hence adjusting the average of base year.
- The second term is the chained index movement from December previous year to December y-1 (a product of yearly index links [short-term - links] from December to December).
- The last part is showing the movement from December y-1 to month m year y.

Measures of index

The annual change measures the price change between the current quarter and the same quarter of previous year. This measure is responsive to recent changes in price levels but can be influenced by one – off effects in either quarter.

Quarterly change measures the price changes between current quarter and previous quarter.
