

Short Term Statistics

Fourth Quarter 2015

Tirana, 1 April: INSTAT publish "Short term statistics of economical enterprise" data of fourth quarter 2015 according the Nomenclature of Economical Activities, NACE Rev. 2, updated base from 2005 to 2010. The questionnaire covers: "Industry" (where are included "Mining and Quarrying" and "Manufacturing"), "Electricity, gas, steam", "Water supply; sewerage, waste management and remediation activities", "Construction" and "Services" (included the activity of Trade, Transport and storage, Hotels, Information and communication, Architectural and engineering activities, Travel agency) (see: Methodological elucidations pg.19).

In the fourth quarter 2015, the volume turnover index was 131.6 % against the base year (2010=100).

The annual change of this index presents an increase 2.1 % in the activities covered in the quarterly survey compared with the fourth quarter 2014. This change on the same quarter 2014 was increase 2.6 %.

The quarterly change of volume turnover index, in the fourth quarter 2015 presents an increase by 3.7 % compared with the previous quarter. This increase is mainly indicated by the activities, "Construction" and "Electricity, gas, steam" respectively 28.9 % and 13 %.

Industry, Electricity and Water

The volume turnover in the fourth quarter 2015 decreased by 4.4 % in "Industry" (where are included "Mining and quarrying" and "Manufacturing") compared with the fourth quarter 2014. This decrease is indicated by "Mining and quarrying" activity by 37.2 %.

Referred the same comparable period the "Manufacturing" activity in the volume turnover increased by 10.4 % while in the activity "Electricity, gas, steam" this indicator decreased by 4.5 %.

Quarterly change of the volume turnover presents a decrease by 6.3 % in "Industry" compared with the third quarter 2015. The "Manufacturing" activity has given the main impact by 19.6 %.

The volume turnover indicator increased by 13.0 % in "Electricity, gas, steam" meanwhile "Water supply; sewerage, waste management and remediation activities" increased by 10.3 %.

The industrial production volume in the fourth quarter 2015 presents a decrease by 6.6 % in the activities covered by "Industry" sector compared with the same quarter of previous year. The main impact is given by the activity "Mining and quarrying" with a decrease by 27.5 %.

While the production volume of "Manufacturing" increased by 13.4 % referred the same comparable period.

The industrial production volume in the fourth quarter 2015 presents a decrease by 12.6 % in the activities covered by "Industry" compared with the previous quarter. The "Mining and quarrying" activity has given the main impact by 19.0 %.

The industrial production volume during the fourth quarter 2015 increased in "Electricity, gas, steam" and "Water supply; sewerage, waste management and remediation activities" respectively by 79.9 % and 2.9 % compared with the third quarter 2015.

The number of employees in "Industry" sector (where are included "Mining and Quarrying" and "Manufacturing") increased by 11.6 % from fourth quarter 2015 to fourth quarter 2014.

Activities as "Electricity, gas, steam" and "Water supply; sewerage, waste management and remediation activities" this indicator increased respectable by 14.2 % and 21.0 %.

The quarterly change of number of employees in "Industry" sector results increased by 3.9 %.

During the fourth quarter 2015, "Wages" level is increased by 4.2 % in "Industry", compared with the same quarter of the previous year, mainly indicated from "Manufacturing" activity by 16.1 %.

For the same comparable period this indicator in “Electricity, gas, steam” decreased by 1.2 % while the activity “Water supply; sewerage, waste management and remediation activities” increased by 12.5 %.

During the fourth quarter 2015, “Wages” level is decreased by 2.4 % in “Industry”, compared with the previous quarter mainly indicated by “Manufacturing” by 6.5 %.

In the “Water supply; sewerage, waste management and remediation activities” wages increased by 1.6 %.

Construction

Turnover volume index, in the “Construction” activity, in the fourth quarter 2015 increased by 14.5 % compared with the fourth quarter 2014. Referred to the same period the construction volume increased by 22.2 %.

The number of employees in “Construction” activity in the fourth quarter 2015 increased by 12.5 % compared with the fourth quarter 2014 and the wages increased by 10.1 % during the same period.

In the fourth quarter 2015, turnover volume index increased by 28.9 % compared with the third quarter 2015 meanwhile the construction volume index increased by 31.7 % during the same period.

The number of employees in “Construction” activity in the fourth quarter 2015 increased by 6.9 % compared with the third quarter 2015 meanwhile the wages increased by 2.4 %.

Services

In the fourth quarter 2015, the volume turnover index in activities of “Services” increased by 1.8 % compared with the fourth quarter 2014, mainly indicated from the activity “Wholesale and retail sale and repair of motor vehicles” by 26.1 %.

In the fourth quarter 2015, the volume turnover index in activities of “Services” increased by 0.6 % compared with the previous quarter, mainly indicated from “Wholesale and retail sale and repair of motor vehicles” by 20.2 %.

In the fourth quarter 2015, the number of employees index in the “Services” activities increased by 16.2 % compared with the same period of previous year, mainly indicated from “Wholesale trade” and “Information and Communication” activities respectively by 19.1 % and 17.2 %.

In the fourth quarter 2015, the number of employees’ index in the “Services” activity increased by 1.8 % compared with the third quarter 2015. Main impact is from the activities “Wholesale and retail sale and repair of motor vehicles” and “Information and Communication” respectively by 2.2 % and 2.7 %.

In the “Services” activity in fourth quarter 2015, the wage index increased by 10.8 % compared with the same period of the previous year. Main impact is from “Wholesale trade” by 18.0 %.

In the fourth quarter 2015 in the “Services” activity, the wage index increased by 2.6 % compared with the third quarter 2015. Main impact is from “Wholesale and retail sale and repair of motor vehicles” and “Information and Communication” respectively by 3.9 % and 3.7 %.

Wholesale and retail sale and repair of motor vehicles and Wholesale

In the fourth quarter 2015, in the activity “Wholesale” the volume turnover index increased by 0.9 % meanwhile in activity “Wholesale and retail sale and repair of motor vehicles” increased by 26.1 % compared with the same period of the previous year.

Quarterly change, in the activity “Wholesale and retail sale and repair of motor vehicles”, the volume turnover index presents an increase by 20.2 % while in the activity “Wholesale” this indicator decreased by 0.7 % compared with the previous quarter.

In the fourth quarter 2015, in activity “Wholesale”, the annual change of index of the number of employees increased by 19.1 % compared with the fourth quarter 2014.

Compared with the third quarter 2015 this indicator increased by 0.6 %.

In the activity "Wholesale" in the fourth quarter 2015, the wage index increased by 18.0 % compared with the same period of previous year, meanwhile "Wholesale and retail sale and repair of motor vehicles" increased by 15.0 %.

In quarterly change, wages in "Wholesale" activity increased by 3.3 % compared with the third quarter 2015, meanwhile "Wholesale and retail sale and repair of motor vehicles" increased by 3.9 %.

Transport and Storage (included "Post" activity)

In the activity "Transport and Storage", the volume turnover index decreased by 39.9 % compared with the fourth quarter 2014.

Quarterly change of the volume turnover index, in activity of the "Transport and Storage" decreased by 13.3 %.

The number of employees in the activity "Transport and Storage" decreased by 0.6 % in the fourth quarter 2015 compared with the fourth quarter 2014.

The number of employees in the activity "Transport and Storage" increased by 0.6 % in the fourth quarter 2015 compared with the third quarter 2015.

The annual change of wages index in the activity "Transport and Storage" presents a decrease by 13.3 %.

The quarterly change of wages index in the activity "Transport and Storage" is increased by 1.6 %.

Hotels

In the "Hotels" activity, the volume turnover index increased by 11.3 % in the fourth quarter 2015 compared with the fourth quarter 2014.

The quarterly change of the volume turnover index represents an increase by 20.0 % in "Hotels" activity compared with the third quarter 2015.

In the fourth quarter 2015, in "Hotels" activity, the annual change of the index of number employees represents an increase by 11.5 % while the quarterly change represents a decrease by 10.0 %.

In the fourth quarter 2015, in "Hotels" activity, the wages index represents an increase by 6.9 % compared with the fourth quarter 2014 while compared with the third quarter 2015 this indicator decreased by 10.8 %.

Information and Communication

In the “Information and communication” activity, the volume turnover index, increased by 3.0% in the fourth quarter 2015 compared with fourth quarter 2014.

The quarterly change of the volume turnover index in “Information and communication” activity represents an increase by 10.4 % compared with the third quarter 2015.

In the fourth quarter 2015, in “Information and communication” activity, annual changes of the number of employees index represent an increase by 17.2 % compared with fourth quarter 2014.

In the fourth quarter 2015, in “Information and communication” activity quarterly change of the number of employees index represent an increase by 2.7 %.

In the fourth quarter 2015, in the “Information and communication” activity, annual change of the wages index decreased by 0.1 % compared with the fourth quarter 2014 while compared with the third quarter 2015 this indicator increased by 3.7 %.

Architectural and Engineering activities

In the section “Architectural and engineering” activity the volume turnover index increased by 9.3 % in the fourth quarter 2015 compared with fourth quarter 2014.

The quarterly change of the volume turnover index represents an increase by 6.3 % compared with the previous quarter.

In the fourth quarter 2015, in “Architectural and Engineering” activity, annual change of the number of employees index increased by 14.2 % meanwhile the quarterly change of the number of employees index increased by 11.6 %.

The annual change of the wages index represents an increase by 19.3 % compared with the fourth quarter 2014.

In the enterprises of this activity, the wages index increased by 1.4 % compared with the third quarter 2015.

Travel Agency

In the section “Travel agency” activity, the volume turnover index increased by 21.8 % in the fourth quarter 2015 compared with the fourth quarter 2014.

The quarterly change of the volume turnover index represents a decrease by 0.3 % compared with the previous quarter.

In the fourth quarter 2015, in "Travel agency" activity, annual change of the number of employees index represents an increase by 22.0 % compared with the fourth quarter 2014. The number of employees index represents a decrease by 3.4 % compared with previous quarter.

The wages index represents an increase by 17.3 % compared with the fourth quarter 2014 while compared with the previous quarter this indicator decreased by 0.4 %.

Information for the users

Since the first quarter 2016, INSTAT will present the quarterly statistical data of the activities Mining and quarrying, Manufacturing Industry and Electricity, according the Main Industrial Groups classification, as following:

- Intermediate goods
- Energy
- Capital goods
- Durable consumer goods
- Non-durable consumer goods

Main Industrial Group provides an alternative grouping of economical statistical activities of Industry comparing to the sectional grouping classification according the Nomenclature of Economic Activities Rev. 2 (NACE Rev.2).

The Main Industrial Group classification is based on the regulation of Commission no. 656/2007.

Methodological elucidations

General information

INSTAT, in the wake of its efforts to standardizing and approaching the Albanian statistics to the Eurostat and the standards of EU statistics, publicise the economical indicators such as The volume turnover, Production volume, The number of employees and Wages for these activities: Industry (where are included Mining and Quarrying and Manufacturing); Electricity, gas, steam; Treatment and water supply; Construction and Services (where is included the Trade; Transport and storage; Hotels; Information and communication; Architectural and engineering activities, Travel agency)

In the Trade, the survey covers the activity of the Retail Trade and Wholesale, and the Total sale of motor vehicles and repair of motor vehicles. The indicators of Retail Trade are publicised separately from this publication. For further information, please continue the link as follows:
<http://www.instat.gov.al/en/themes.aspx>

The methodological changes are refereed to:

- The application of the revised nomenclature of economic activities, NACE Rev. 2;
- The re-basing process, i.e. the weights within the structure of economy is updated with the base year from 2005 to 2010;
- The re-referencing process, i.e. the periods of reference are updated from 2005=100 to 2010=100.

The application of the Nomenclature of economic activities NACE Rev. 2 is based on the legal act approved through the Decree of the Council of Ministers N° 320, date 20. 05. 2014.

For more information, see http://www.instat.gov.al/media/248316/njoftim_per_media_-_ndryshimi_i_nomenklatur_s_s_veprimtarive_ekonomike_rev_2.pdf

The revised classification differs considerably from the existing classification in terms of structure, classification and methodological treatment of certain activities.

The process of passing of statistical units from NACE Rev. 1.1 to NACE Rev. 2 is performed through the construction of a converted matrix, based on the statistical information obtained from the Structural Business Survey of Enterprises 2010. Referring to the mentioned matrix, in general the activities pass from one classification to other one by one, for the other activities where the changes that the new classification brought into the sectors covered by short term statistics survey are the following:

- a. By old classification (NACE rev.1.1) the "Publication" activities (division 22) correspond to the new classification with new division 58, "Information and communication" section.

- b. Division 45, which correspond in the NACE Rev.1.1 with “Construction” activity, in the new NACE is split up in three activities, respectable: division 41 – “Construction of dwellings”, division 42 – “Civil engineering work”, division 43 – “Other specialized construction work” . Also part of this section is also group of activities related to “Real estate activities” which correspond with NACE rev.1.1 with group 70.1.
- c. The postal and courier activities, respectively in the classes 64.11 and 64.12 in NACE rev.1.1 passed to the “Transport and storage activities” division 53, in the NACE rev.2, “Post and courier activities”.
- d. Another novelty of the new classification is the pass of the “Collection and Treatment of waste” in the domain of the STST survey, which correspond partially with division 90 in the NACE rev.1.1, to the division 38 “Collection, treatment and management of waste” in NACE rev.2. Also here passed the “Recycle” activities” group 38.3, which correspond with NACE rev.1.1 with division 37, “recycle activities”.
- e. In the group 71.0, “Architectural and engineering activities” which correspond with NACE rev.2 with “Architectural and engineering, testing and technical analyses activities” description also are passed to the activities of testing and analyses, which correspond with group 74.3-74.8, “Testing and technical analyses activities”.

The main indicator of the Turnover is used for the re-evaluation of the passing of the economic activities from the old to the new classification. The main methods used for the evaluation are two:

1. Micro approach method
2. Macro approach method

The first method was used in the first three years of the reclassification of the activities of the units on the individual level in the Statistical Business Register, 2010-2012.

The second method was used for the re-evaluation of the data in time series back for the period 2005-2010.

In order to reflect the changes that have taken place within the structure of economy, from the publication of the first quarter 2014 on, the base year of the Short term statistics is updated from 2005 to 2010.

The process of passing from the old to the new base consists of two steps: re-weighting, i.e. the weights used for the calculation of the indexes are updated from the base year 2005 to the base year 2010; and re-referencing, i.e., the periods of reference are updated from 2005=100 to 2010=100. In the Short term statistics the two steps are used simultaneously. The data series are equivalent to each other; the growth rates are the same, and a series is convertible to the other.

Information on the observation

Purpose – The short term statistics shows the trend of economic development of a country in quarterly periods, by which the police makers can develop a short term plan for the further development of the

country. By this publication the development of the main indicators such as industrial production, turnover, number of employees and wages, in time series are describe.

Coverage- based on main economic activity the main activities covered in the STS survey is as following:

- Industry - composed by Mining and quarrying and Manufacturing industry (05-33)
- Electricity, gas, and steam (35)
- Water supply; sewerage, waste management and remediation activities (36)
- Construction (41, 42, 43)

As the result of applied of the new classification, NACE Rev. 2, the activities that are included in the sector of Services with relevant codes are structured as follow:

- Total sale and repair of motor vehicles (45) and Wholesale, excluding the Total sale and repair of motor vehicles (46)
- Transportation and Storage (is included and the Postal and courier activities) (49-53)
- Accommodation and Food Services, Hotels (55.1)
- Information and Communication (58, 61, 62)
- Architectural and Engineering activities (71)
- Administrative Services and ancillary activities – Travel Agencies (79)

Services composed by: Wholesale trade, Wholesale and retail sale of mote vehicle and repair of motor vehicle; Hotel; Transport and storage; Information and communication; Travel agency, other services.

Model - The enterprises are selected from the Statistical Register of Enterprises. The enterprises with 1-9 employees are surveyed by sample survey, whereas the enterprises with 10 and more employees are surveyed exhaustively.

Data collection - The data are collected directly from enterprises with face to face interview through interviewers. The questionnaire is filled from the interviewers.

Indicators – The indicators are given in Index form, the quarterly changes are given in percentage, whereas the annual changes are given in percentage with reference to the base year, actually 2010=100. The data do not present absolute values.

Indexes – The indexes show the changes in time of a given variable, or of a group of variables. The Index Volume is calculated through the Laspeyres Formula. In order to avoid the prices impact, the indices are deflated with the proper price index by activities, such as the Industry indicator are deflated with Producer Price Index; Construction activity with Construction Cost Index; Hotel activity with Consumer Price Index, Transport with implicit price index calculated, etc.

The annual change in percentage - it measures in percentage the change of economic indicators of the actual quarter compared with the same quarter of the previous year.

The quarterly change in percentage – it measures in percentage the change of economic indicators of the actual quarter against compared with the previous quarter of the same year.

Revision – Indexes may be revised due to several reasons: additional information, the methodological changes, or re-evaluation of the used coefficients etc.

Definition of the main indicators

Turnover is the total amount realized by enterprises during the month from the selling of goods, selling of own products and services excluded VAT.

Number of persons working includes all persons who actually work in the observed unit. There are included, owners and co-owners and family members that helps in the activity and employees in the end of the quarter.

Employment index – shows the evolution of employment in observation unit.

Wages and salaries – are defined as the total remunerations, in cash or in kind payable to all persons counted on the payrolls, in return for work done during the accounting period.

Index of wages and salaries – the gross wages and salaries index approximates the development of the wages and salaries bill.
