Producer price Index

Fourth quarter, 2017

Tirana, 05 March 2018: In fourth quarter 2017, producer price index reached 102.8, increasing by 2 %, compared with the same period of 2016 and by 1.7 % compared with third guarter 2017.

Fig. 1 Producer Price Index

The annual change of producer price index is 2 %. Producer price index in "mining and quarrying" section increased by 7.8 %. Within this section a positive contribution was given by the group "extraction of crude petroleum and natural gas, auxiliary services" with 11.7 %.

Producer prices index in "manufacture" section, increased by 1.6 %. The main impact on this increase was given by the activities such as metallurgy with 6.2 %, manufacture of non-metallic mineral products with 4.5 % and manufacture of dressing with 0.3 %.

Producer price Index for domestic market reached 100.2, signing an increase by 0.9 %, compared with the same period of 2016.

Export price index reached 107.5, signing an increase by 4.6 %, compared with the fourth quarter of the previous year.

05/03/2018

Producer Price Index

In fourth quarter 2017, **producer price index** signed an increase by 1.7 %, compared with the third quarter of 2017. Producer prices index in "mining and quarrying" section increased by 8.3 %, compared with the third quarter 2017. In this section the highest increase is recorded on extraction of crude petroleum and natural gas products, by 12.6 %.

Producer price index in "manufacturing" section signed an increase by 0.6 % compared with the previous quarter. The main impact on this increase was given by the activities such as metallurgy by 1.8 %, manufacture of non-metallic mineral products by 0.9 % and manufacture of dressing by 0.4 %.

Compared with third quarter 2017, **producer prices for domestic market** signed an increase by 0.8 %. The main impact on this increase was given by "mining and quarrying" section with 7.6 %.

Export price index signed an increase by 3.0 % compared with the previous quarter. The main impact on this increase was given by "mining and quarrying" and "manufacturing" sections by 8.8 % and 1.2 %, respectively.

Metodology

Producer price index measures the change in the prices of products at the first point of sale after production. Producer Price Index is compatible with Eurostat methodology and covers following economic activities:

- Extracting industry. B
- Manufacturing industry. C
- Electric power. water and gas. D
- Water supply. treatment activities and waste management

INSTAT calculates Producer Price Index for Domestic Production and Export Price Index. Calculation and publication of Producer Price Index in Albania include:

- Producer Price Index in Total
- Producer Price Index for Domestic Production
- Export Price Index

These indices are calculated for each product classified according to the Classification of Products by Economic Activity (CPA) in 6 – digit level and are published in two digit level. Renovation of the basket of enterprises and products is based on the results of Annual Structural Survey of Enterprises. For calculation of products 'weights of Producer Price Index for Domestic Production are used data coming from SBS while for calculation of products' weights of products' weights of Export Price Index are used data coming from Foreign Trade Statistics.

Producer Price Index (PPI) is calculated taking into consideration 2010 as base year (2010 = 100). Calculation's method used in compiling of this index is Laspayer chain – index. It means that each transaction will be compared with its previous year December price (y -1).

Index calculation

For calculation of index is used Laspeyer type and is calculated as following:

$$I_{2010}^{y,m} = \frac{100}{\frac{1}{12} \sum_{M=JAN}^{DEC} I_{2010Dec}^{2010,M}} \times \prod_{Y=2010}^{y-1} I_{Y-1,dec}^{Y,dec} \times I_{y-1,dec}^{y,m}.$$

Producer Price Index

- The first part before the equal sign is stating the price level of December 2009 in percent of the average price level during 2010. hence adjusting the average of 2010 to 100.
- The second term is the chained index movement from December 2010 to December y-1 (a product of yearly index links [short-term links] from December to December).
- The last part is showing the movement from December y-1 to month m year y.

Measures of index

The annual change measures the price change between the current quarter and the same quarter of previous year. This measures is responsive to recent changes in price levels but can be influenced by one – off effects in either quarter.

Quarterly change measures the price changes between current quarter and previous quarter.
