

Producer price Index

Third quarter, 2018

Tirana, 05 December 2018: In third quarter 2018, producer price index reached 104.0, increasing by 2.8 %, compared with third quarter 2017.

Producer price index, in third quarter 2018, increased by 0.4 % compared with second quarter 2018.

Fig. 1 Producer Price Index

Annual change of producer price index

Producer price index in “Mining and quarrying” section increased by 20.2 %. Within this section a positive contribution was given by the group “Extraction of crude petroleum and natural gas, auxiliary services” by 33.8 %. Producer prices index in “Manufacture” section, decreased by 1.0 %. The main impact on this decrease was given by the activities such as “Manufacture of non-metallic mineral products” by 0.6 %, “Manufacture of food products” by 2.9 %, “Metallurgy” by 0.9 % and “Manufacture of dressing: wearing apparel” by 1.2 %.

Producer price Index for domestic market reached 101.3, signing an increase by 1.9 %, compared with the same period of 2017.

05/12/2018

Export price index reached 108.9, signing an increase by 4.4 %, compared with the third quarter of the previous year.

Quarter changes of Producer Price Index

Producer price index, in third quarter 2018, increased by 0.4 % compared with second quarter 2018. Producer prices index in "Mining and quarrying" section increased by 2.5 %, compared with the second quarter 2018. The main impact on this increase was given by "Extraction of crude petroleum and natural gas products", by 2.4 %.

Producer price index in "Manufacturing" section signed a decrease by 0.1 % compared with the previous quarter. The main impact on this decrease was given by the activities such as "Manufacture of food products" by 1.0 %, "Manufacture of fabricated metal products, except machinery and equipment" by 0.7 % and "Manufacture of leathers and leather products" by 1.6 %.

Compared with second quarter 2018, **producer prices for domestic market** signed an increase by 0.4 %. The main impact on this increase was given by "Electricity, gas, steam and air conditioning" section and "Mining and quarrying" section.

Export price index signed an increase by 0.5 % compared with the previous quarter. The main impact on this increase was given by "Mining and quarrying" by 2.4 %.

Methodology

User information

Producer price index measures the change in the prices of products at the first point of sale after production. Producer Price Index is compatible with Eurostat methodology and covers following economic activities:

- Extracting industry. B
- Manufacturing industry. C
- Electric power, water and gas. D
- Water supply, treatment activities and waste management

INSTAT calculates Producer Price Index for Domestic Production and Export Price Index. Calculation and publication of Producer Price Index in Albania include:

- Producer Price Index in Total
- Producer Price Index for Domestic Production
- Export Price Index

These indices are calculated for each product classified according to the Classification of Products by Economic Activity (CPA) in 6 – digit level and are published in two digit level. Renovation of the basket of enterprises and products is based on the results of Annual Structural Survey of Enterprises. For calculation of products' weights of Producer Price Index for Domestic Production are used data coming from SBS while for calculation of products' weights of Export Price Index are used data coming from Foreign Trade Statistics.

Producer Price Index (PPI) is calculated taking into consideration 2010 as base year (2010 = 100). Calculation's method used in compiling of this index is Laspayer chain – index. It means that each transaction will be compared with its previous year December price (y -1).

Index calculation

For calculation of index is used Laspeyer type and is calculated as following:

$$I_{2010}^{y,m} = \frac{100}{\frac{1}{12} \sum_{M=JAN}^{DEC} I_{2010Dec}^{2010,M}} \times \prod_{Y=2010}^{y-1} I_{Y-1,dec}^{Y,dec} \times I_{y-1,dec}^{y,m}.$$

- The first part before the equal sign is stating the price level of December 2009 in percent of the average price level during 2010. hence adjusting the average of 2010 to 100.
- The second term is the chained index movement from December 2010 to December y-1 (a product of yearly index links [short-term - links] from December to December).
- The last part is showing the movement from December y-1 to month m year y.

Measures of index

The annual change measures the price change between the current quarter and the same quarter of previous year. This measures is responsive to recent changes in price levels but can be influenced by one – off effects in either quarter.

Quarterly change measures the price changes between current quarter and previous quarter.
