3. Statistical presentation	
3.1. Data description	<p><i>Penal offences and perpetrators</i></p> <p>INSTAT collect, analyse and publish data regarding criminal offences, perpetrators and damaged persons from criminal offences. Crime statistics (CS) refers to recorded specific offences by police, the classification in crime and contraventions is done based on Criminal Code of Albania. These recorded cases are related to incidents as occurred, and not to the trials, the verdict of which is given by the law bodies.</p> <p>Data on perpetrators are based on suspected persons in committing an offence. Are included data on perpetrators by specific criminal offences and total perpetrators by age group (juvenile and adult). Attention should be paid not only to recorded penal offences or the perpetrators, but also to protect the position of the person injured by the commission of the offense.</p>

	<p><i>Statistics on criminal proceedings and defendants person</i></p> <p>These statistics refers to person to whom the criminal offence has been attributed through the act of notification of accusation. Data are presented by sex, age group and criminal offences.</p> <p><i>Statistics on convicted persons</i></p> <p>Statistics on convicted persons reflect data on number of persons, to whom criminal sanctions are applying, consisting in restriction of certain rights that they enjoyed until the commission of the offence. The main sanctions are prison, fine and alternative sanctions. Alternative sanctions may consist on: Fragmentation of imprisonment, suspending the execution of a sentence, Suspension of imprisonment and compulsion to perform labour in favour of public interest.</p> <p>Statistical data on convictions includes: convicted persons by sex and age group, convicted persons by crimes, by district courts and convicted persons of crimes and contraventions by sex.</p> <p><i>Statistics on prisoners</i></p> <p>Statistics on prisoners include juvenile persons (under 18 years old), adults (over 18 years old) by gender who have been convicted by a final decision and pre-detainees over the years. The number of prisoners shows the prisoners' situation in a given year, including new arrivals and exits that occur for the period in question, and is calculated as an average of the number of prisoners per month.</p> <p><i>Crime indicators</i></p> <p>These indicators are calculated on the data provided by the Directorate of State Police, the General Directorate of Prisons and the annual estimates of the resident population by INSTAT</p>
3.2. Classification system	Crime statistics are based on the classification of Albanian Penal Code: http://www.pp.gov.al/web/Kodi_Penal_48_1.php#.W-vr-fZFyUk
3.3. Sector coverage	Crime and criminal data cover different stages of the criminal justice system - the reporting of crime to the police, prosecution, courts and prison.
3.4. Statistical concepts and definitions	<p><i>Criminal offences:</i> Behaviour, acts which damaged legal values of a certain community. They are divided into crimes and contraventions.</p> <p><i>Contraventions:</i> acts that violate legal or damaged goods with a value of less than offenses (crimes) therefore violate the legal order but do not affect its bases and have serious social consequences.</p> <p><i>Recorded criminal offences:</i> Recorded criminal offences in police or the police have knowledge of them in other ways.</p> <p><i>Crime against a person:</i> Acts of intent or negligence that affect or</p>

threaten life, health, freedoms, sexual intolerance, honour and dignity of a person, specially protected by the legislation criminal

Perpetrators: Persons who in their action or inaction allow happening a criminal offence, causes consequences of the offence. Suspected persons over 14 years old have criminal responsibility, while perpetrators under 14 years old are exempted from criminal responsibility.

Juvenile: Every person under 18 years old.

Convicted persons: A person who his behaviour has affected or damaged

	<p>legal goods protected by law. For these persons are applying criminal sanctions consisting in obtaining or restriction of certain rights that they enjoyed until the commission of the offence.</p> <p><i>Criminal cases:</i> Any criminal cases processed under national criminal law.</p> <p><i>Civil cases:</i> Any cases processed under national civil/commercial law.</p> <p><i>Terminated cases:</i> Number of proceedings finalized/disposed of by a court decision.</p> <p><i>Pending cases:</i> Number of proceedings not finalized/disposed of as of 31 December.</p> <p><i>Number of prisoners:</i> The number of persons held in prisons, other institutions, juvenile detention institutions, psychiatric hospitals or other hospitals. Include both inmates and pre-detainees.</p> <p><i>Inmate:</i> Any person, Albanian or foreign, punished by final sentence of imprisonment and in line with the international agreements, punished by a foreign judgment, in compliance with the respective procedural requirements.</p> <p><i>Detainees</i> are person, citizen, foreign or stateless, to who is taken a security measure “detention or arrest in prison”.</p> <p><i>Criminality rate:</i> The number of total recorded offences expressed per 10 thousand inhabitants;</p> <p><i>Prisoner’s rate:</i> Number of prisoners (inmate + detainees) over a period of 1 year expressed per 10 thousand inhabitants;</p> <p><i>The percentage of detainees in deprivation of liberty</i> expresses the total number of persons held in detention have not been convicted yet, as a percentage of the total number of persons held in prisons;</p> <p><i>Police personnel rate</i> express the total number of officers per 100,000 populations in a given year;</p>
3.5. Statistical unit	Statistical units are perpetrators of criminal offences, defendants, convicted and prisoners.
3.6. Statistical population	Statistical populations relate to: criminal offences recorded by the police, number of persons suspected in committing a crime, number of victims of specific crimes, persons prosecuted, convicted, acquitted, or held in prison, number of persons working in specific roles within the criminal justice system, number of cases processed by the courts.
3.7. Reference area	The aggregated data are country level and for the 12 prefectures.
3.8. Time coverage	<p>Data are available from 2010 and on-going for:</p> <ul style="list-style-type: none"> • Criminal offences • Perpetrator • Convicted persons • Prisoners

3.9. Base period	Not applicable for crime statistics.
4. Unit of measure	<p>Different units of measure can be used for crime statistics.</p> <p>The basic statistical units in crime statistics are the criminal offences and the cases.</p> <p>The unit of measure for victims of specific crimes, perpetrators, persons prosecuted and persons convicted or held in prison criminal justice personnel is person.</p>
5. Reference period	The reference period for the CS is 2017 .
6. Institutional mandate	
6.1. Legal acts and other agreements	<p>The legal basis for the CS are:</p> <p>Law No.17/2018 on Official Statistics; http://www.instat.gov.al/media/3972/law-no17-2018-on-official-statistics.pdf</p> <p>Official Statistics National Program 2017-2021; http://www.instat.gov.al/media/3705/psz-2017-2021_english.pdf</p> <p>Memorandum of Understanding with General Directorate of Police Memorandum of Understanding with General Directorate of Prison</p>
6.2. Data sharing	INSTAT transmits data regarding crime statistics in Eurostat on questionnaires that are required to fulfil as UN-CTS questionnaire, data on crime and criminal justice and migrant smuggling questionnaire.
7. Confidentiality	
7.1. Confidentiality - policy	The data collected are considered as strictly confidential and used only for statistical purposes and scientific research in accordance with the national Statistical Law No.17/2018 "On Official Statistics", date 10.03.2018 and the Law no. 9887, dated 10.03.2008 "Personal Data Protection", Article 31 of the Law on Official Statistics clearly define that all statistical information collected by INSTAT are confidential and may only be used or published in such summary tables that do not identify the information of the unit. The direct identification is called when a statistical unit is directly identified by the name, address or any officially recognized identification number. When data processing is performed in such a way as to enable the data subject to be identified, the data must be coded immediately so that the entities are no longer recognized.
7.2. Confidentiality - data treatment	The data are published in aggregated level. Data on individual level are never published.
8. Release policy	
8.1. Release	INSTAT publishes yearly a release calendar for all its publication for the

calendar	current year. The calendar is publicly accessible on the INSTAT website. Releases and delays are pre-announced in the publication calendar. In the case of delays is specified the next date of publication as well as the explanation related to the reasons of delays.
8.2. Release calendar access	The Calendar of Publications is available on the INSTAT website. http://instat.gov.al/en/publications/calendar/
8.3. User access	In line with the Article 34 of National Statistical Law No.17/2018 on Official Statistics, INSTAT disseminates statistics on INSTAT website and other media for simultaneous access, respecting professional independence and in an objective, professional and transparent manner in which all users are treated equitably. The following dissemination channels are used to release the results: 1. Website – online release; 2. Written requests; 3. Crimes and criminal justice publications; 4. Data request, session available for external users in the link below: http://www.instat.gov.al/en/about-us/data-request/
9. Frequency of dissemination	The dissemination of CS data is done in annual and quarterly basis.
10. Accessibility and clarity	
10.1. News release	The news release of quartely data on crime statistics is available in INSTAT website: http://www.instat.gov.al/en/themes/demography-and-social-indicators/crimes-and-criminal-justice/#tab3
10.2. Publications	Crime Statistics publications <ul style="list-style-type: none"> • Quarterly: Crime Statistics General publications, module on crime statistics • Yearly: <ul style="list-style-type: none"> ○ Women and Men in Albania, ○ Albania in figures, ○ Statistical Yearbook, ○ Regional Statistical Yearbook. • Dedicated publication: <ul style="list-style-type: none"> ○ Statistics on Crime and Criminal Justice
10.3. On-line database	Statistical database: http://databaza.instat.gov.al/pxweb/sq/DST/CRIME/
10.4. Micro – data access	Not applicable
10.5. Other	INSTAT transmits data to Eurostat for crime and criminal statistics through a joint Eurostat-UNODC data collection, every year in September. The UNODC questionnaire includes 8 sheets to be filled in and is complemented by the Eurostat questionnaire. The Eurostat

	questionnaire comprises 1 sheet containing questions required by European Commission for its specific policy areas. The questionnaire contains data on recorded penal offenses, perpetrators, victims of homicide, data on prosecution, prisoners, convicted and acquitted persons.
10.6. Documentation on methodology	Data are reported by official sources in the countries such as the Police, the Ministry of Justice, the Prosecution and Prison. A short explanation related to the definitions of the main concepts and methodological explanations are provided to users in the end of publications and also in Crimes and criminal justice theme in the following link http://www.instat.gov.al/en/themes/demography-and-social-indicators/crimes-and-criminal-justice/#tab4 Additional support information is given to internal users when needed or required.
10.7. Quality documentation	The sector of Socio-Demographic Analyses document all processes and procedures of work for internal use.
11. Quality management	
11.1. Quality assurance	INSTAT is committed to ensure the highest quality with respect to the compilation of statistical information. In accordance with the Statistics Law No 17/2018, INSTAT use statistical methods and processes in compliance with internationally recognized scientific principles and standards conduct on-going analyses of the statistics with a view to quality improvements and ensure that statistics are as up-to-date. In performing its tasks it follows the general principles of quality management from the European Statistics Code of Practice. INSTAT declares that it takes into account the following principles: impartiality, quality of processes and products, user orientation, employee orientation, effectiveness of statistical processes, reducing the workload for respondents
11.2. Quality assessments	Crime and criminal justice statistics are administrative data. This are compared with the data of the previous years in order to distinguish if the data are coherent or they had big changes.
12. Relevance	
12.1. User needs	Users of Crime Statistics are classified as external and internal. <ul style="list-style-type: none"> • External users are: <ul style="list-style-type: none"> ○ Institutions of Public Administration. ○ Universities. ○ National and international NGOs. ○ Business ○ General public and other groups of interest. ○ Some main indicators are sent to European Commission, UN

	<p>Organizations, etc.</p> <ul style="list-style-type: none"> Internal users are those within INSTAT, who use Crime Statistics as input for their work. <p>The main purpose of producing these statistics is to provide a more comprehensive information due to the social importance that bear these statistics as well as public concerns associated with them. The main users are local or central government, academia or simple users interested in crime statistics.</p>
12.2. User satisfaction	<p>Page Views (Hits) Crime Statistics in 2017 are around 1183 clicks. INSTAT during 2017 conduct for the first time User Satisfaction Survey. Users to the questions: “How do you rate the overall quality of Crime Statistics?” using a scale from 1 to 5 (1=very poor, 2=poor, 3=adequate, 4=good, 5=very good), have assessed the quality of the data with an average of 3.51 (70.2%). The results of User Satisfaction Survey are published in the following link:</p> <p>http://www.instat.gov.al/en/documentation/quality-in-statistics/user-satisfaction-survey/</p>
12.3. Completeness	<p>INSTAT transmits to Eurostat questionnaire regarding crime statistics. A joint annual data collection includes 7 sheets from UNODC questionnaire and 1sheet from Eurostat. In total there are 161 indicators that are required from which INSTAT fulfil 80 indicators. The questionnaire also contains rotating indicators that change with the reference period.</p>
13. Accuracy and reliability	
13.1. Overall accuracy	Not applicable
13.2. Sampling error	Not applicable
13.3. Non - sampling error	<p>Before the data are published INSTAT checks the data, and if there are changes in trends or wrong calculations, the data will be revised. Since in the justice system, the data are produced manually there is space for mistakes.</p> <p>In police quarterly data, changes in the number of offences and perpetrators may be occurred very often; the article of an offence change or it may happen that is not a criminal offence. In this cases, INSTAT will revise the data and the changes will be reflected in the next publication.</p>
14. Timeliness and punctuality	
14.1. Timeliness	<p>The reference year is the calendar year and data are final. Publication takes place strictly in accordance with published release dates for all publications in the INSTAT webpage.</p>

14.2. Punctuality	<p>The dissemination of the data is carried out in accordance with the crime statistics availability calendar that the INSTAT compiles and publishes for each year. http://www.instat.gov.al/en/publications/calendar/</p> <p>The publication of CS has been punctual in in 93% of publications carried out over the years.</p> <p>In the second quarter of 2017, there was a delay with 5 days, because administrative were not available on time.</p>
15. Coherence and comparability	
15.1. Comparability - geographical	<p>The crime statistics in some publications are presented at prefecture level such as: Berat; Dibër; Durrës; Elbasan; Fier; Gjikastër; Korçë; Kukës; Lezhë; Shkodër; Tiranë; Vlorë.</p> <p>These statistics are relatively comparable since the data providers for these statistics coordinate the data collection. In contrast, it is well known that crime statistics on international level have low comparability due to different counting rules, legislations, and registration routines and so on. Work to improve the comparability is on-going, for example through Eurostat and UNODC.</p>
15.2. Comparability - over time	<p>Statistics on crime has been held since 1993. Statistical procedures for reported crimes have been amended on several occasions, for example, through the new collection or new accounting methods. While individual events can temporarily affect the statistics for some years, these changes are important to know when comparing the Reported crimes over time. For example, in year 2014 Police implemented a new system on management of cases. From these year data are more accurate and are more.</p>
15.3. Coherence - cross domain	<p>The classification in criminal offences and contraventions is done based on the Criminal Code of the Republic of Albania. These cases are related to incidents as occurred, and not to the trials, the verdict of which falls under the power of the law bodies. This statistical evidence provides data on committed crime in Albania at state level, for each crime evidence contains data on cases (recoded cases, discovered cases and discovered cases from old cases), data on damaged persons by each crime (juvenile, women and foreign persons) and offenders (suspected persons) disaggregated by security measures.</p>
15.4. Coherence - internal	<p>Internal coherence of the data is checked with sum validation rules, as sum of the subtotal, large variation from years, large revisions, as are mention on the report.</p> <p>INSTAT collects data on Domestic violence. The main data providers are General Directorate of Police and Courts. From Police we get data on reported domestic violence, from courts are data on number of persons that required protection (protection request).</p> <p>Data for sex and age group are for perpetrators and damages persons for</p>

	all penal offences, but it's not relevant for each offence.
16. Cost and burden	Sector of Socio Demographic Analyses is part of Directorate of Social Statistics. Sector has 1 person working with crime statistics.
17. Data revision	
17.1. Data revision - policy	Revision policy is done in accordance with general revision policy and errors treatment policy introduced by INSTAT in the links below: http://www.instat.gov.al/media/371722/revision_policy_2016.pdf http://www.instat.gov.al/media/371809/the_errors_treatment_policy.pdf
17.2. Data revision - practise	Regarding questionnaires on crime statistics in case of changes in numbers, INSTAT will make revision on the data.
18. Statistical processing	
18.1. Source data	The dataset is based on administrative sources. The main data providers are: <ul style="list-style-type: none"> • General Directorate of Police • General Directorate of Prisons • Ministry of Justice • General Prosecution Based on these sources INSTAT collects analyses and publishes data regarding crime and judicial statistics. Data are expressed as numbers and as indicators. Figures expressed for 10 thousand inhabitants are total recorded crime rate, prisoner rate, homicide rate per 10 thousand inhabitants.
18.2. Frequency of data collection	Data from General Directorate of Police are collected quarterly and yearly. Data from General Directorate of Prisons, General Prosecution and Ministry of Justice are collected yearly.
18.3. Data collection	An evidence document is sent by General Directorate of Police to INSTAT each quarter of the year. This statistical evidence provides data on committed crime in Albania at state level. Each crime evidence contains data on cases (recoded cases, discovered cases and discovered cases from old cases), data on damaged persons by each crime (juvenile, women and foreign persons) and offenders (suspected persons) disaggregated by security measures. Based on Memorandum of Understanding, INSTAT also collects data on all criminal offences based on Criminal Code. From General Prosecution, INSTAT publishes data on criminal proceedings and defendants by criminal offences. For completeness of international questionnaire about data regarding Prosecution, prepared

	<p>table are required to fulfil from Prosecution.</p> <p>Another data provider for INSTAT is Ministry of Justice. Ministry of Justice publishes each year a yearbook on juridical statistics and INSTAT is based on these publications to provide data about convicted persons, type of crime, measurement, treated cases by level of courts. Supreme Court supplies us with a statistical evidence for cases (criminal, civil and administrative) treated by it from each district court. This evidence contains information about cases, the way of termination and deadlines.</p> <p>Prisoners-related data are provided by the General Directorate of Prison. INSTAT publish data regarding prisoners disaggregated by sex, level of education, two main age group (juvenile under 18 years old and adult above 18 years old) and by type of crimes that are convicted. The information is received from Prison in excel formats based on memorandum of understanding. In each prisons there is a document called daily communicate that is fulfilled by prison personnel, this document contains much information by each person that is in prison. General Directorate of Prison collects these data and provides information on prisoners for each quarter.</p> <p>These sources are very important for the progress of work and meeting of the defined time limits, because INSTAT do not have any other sources, don't conduct any survey on crime statistics. We hope in future to conduct one.</p>
18.4. Data validation	<p>Data verification methods at source of data level are performed such as: check for completeness of data, consistency over time, arithmetic corrections (should not be significantly high), summary controls, control of time-series if there are significant breaks, etc.</p> <p>Also INSTAT does data validation when transmitting the questionnaire through the Eurostat electronic Data files Administration and Management Information System (eDAMIS) and later on if it's needed to qualify for completeness of data, internal consistency of the data, consistency over time and coherence with other relevant data sources.</p>
18.5. Data compilation	Non applicable
18.6. Adjustment	No adjustment is made for CS data.
19. Comment
