Methodology

Exports are goods destined to a third country, placed under customs export or outward processing arrangements or re-exported following inward processing.

The FOB (free on board) value of exports of goods is the value of the goods at the exporter's customs frontier.

Imports are goods arrived from a third country and are directly placed, or are left in warehouse, under customs procedure of release for free circulation, inward processing or processing under customs control.

The cost, insurance and freight (CIF) price is the price of a good delivered at the frontier of the importing country, or the price of a service delivered to resident, before the payment of any import duties or other taxes on imports or trade and transport margins within the country.

Combined Nomenclature (CN) is a goods nomenclature used by international trade in goods statistics and for customs tariffs.
