

Import Price Index

Second quarter, 2021

Tirana, 07 September 2021: In second quarter 2021, Import Price Index reached 101.3 marking an increase by 1.7 % comparing with second quarter 2020. Compare with first quarter 2021 Import Price Index increase by 0.4 %.

Fig. 1 Annual changes of Import Price Index by quarters

Annual change: The highest increase in prices is noted in section of the "Electricity, gas, steam and air conditioning" by 9.7 %. In the section "Manufacturing" which occupies the highest weight with 94.0 % in the value of imports is increased by 1.4 %. In this activity can be mentioned the increased of import prices in "Manufacture of coke and petroleum products refinery" by 5.0 %, followed by "Paper printing and reproduction of recorded media" by 4.4 %, "Metallurgy" by 3.5 %, "Manufacture of tobacco products" by 2.3 %, etc. And prices in "Other transport equipment" activity decreased by 1.1 %, followed by "Manufacture of optics electronics and computer products" by 0.8 %, "Manufacture of textiles" activity decreased by 0.7 %, etc.

Publication date 07/09/2021

Continue

Quarterly change: Import Price Index in the second quarter 2021 increased by 0.4 % comparing with first quarter 2021. Import Price Index in “Manufacturing” section which occupies the highest weight in the value of imports increased by 0.4 % compared with first quarter 2021.

Methodology

The industrial import price index measures the changes of transaction prices of imported products to be traded in the domestic market.

INSTAT calculates and publish:

- Import Price Index
- Quaterly and anually chanches of the index.

Import Price Index covers the following economic activities:

Section B Mining and quarrying

Section C Manufacturing

Section D Electricity gas and steam supply

Section E Water supply sewerage and waste

Index calculation

The indices are calculated for each product classified according to the Classification of Products by Economic Activity (CPA 2008) in 6 – digit level and are published in two digit level.

Measures of index

The annual change measures the price change between the current quarter and the same quarter of previous year. This measures is responsive to recent changes in price levels but can be influenced by one –off effects in either quarter.

Quarterly change measures the price changes between current quarter and previous quarter.
