

RESULTS ON INDUSTRIAL PRODUCTION SURVEY- PRODCOM 2025

INSTAT publishes the data of the Industrial Products Survey (PRODCOM), which provides annual information on the production and sale of industrial products. The data are reported according to the PRODCOM List, a harmonized list published at the European level by Eurostat.

For the reference year 2025, the PRODCOM List 2025 has been applied, which includes changes in product codes and descriptions, as well as the transition from the NACE Rev. 2 to NACE Rev. 2.1 classification. For comparability and time-series analysis purposes, the 2024 data have also been classified according to the same PRODCOM List 2025.

During 2025:

- The production of Portland cement was estimated at 1,993,079 tons, marking an increase of 2.5 % compared to 2024.
- Ready-mix concrete production reached 1,766,302 tons, with a 3.5 % increase, compared to the previous year.
- Production of insulated wire systems for use in vehicles reached 263,046 billions pieces during 2025, with a 8.7 % increase, compared to 2024.
- Fresh bread production reached 67,224 tons, with a 8.4 % increase compared to 2024.
- Among the main products, the highest growth in sales value was recorded for factory-made mortar, with 19.5 % and unwrought alloyed aluminium, with 15.4 %, compared to 2024.
- The sales value of mineral water and aerated water increased by 8.0 % while that of fresh bread rose by 11.1 %, compared to the previous year.
- The sales values for crude petroleum and chromium ore concentrates dropped respectively with 24.3 % and 23.9 %, compared to 2024.

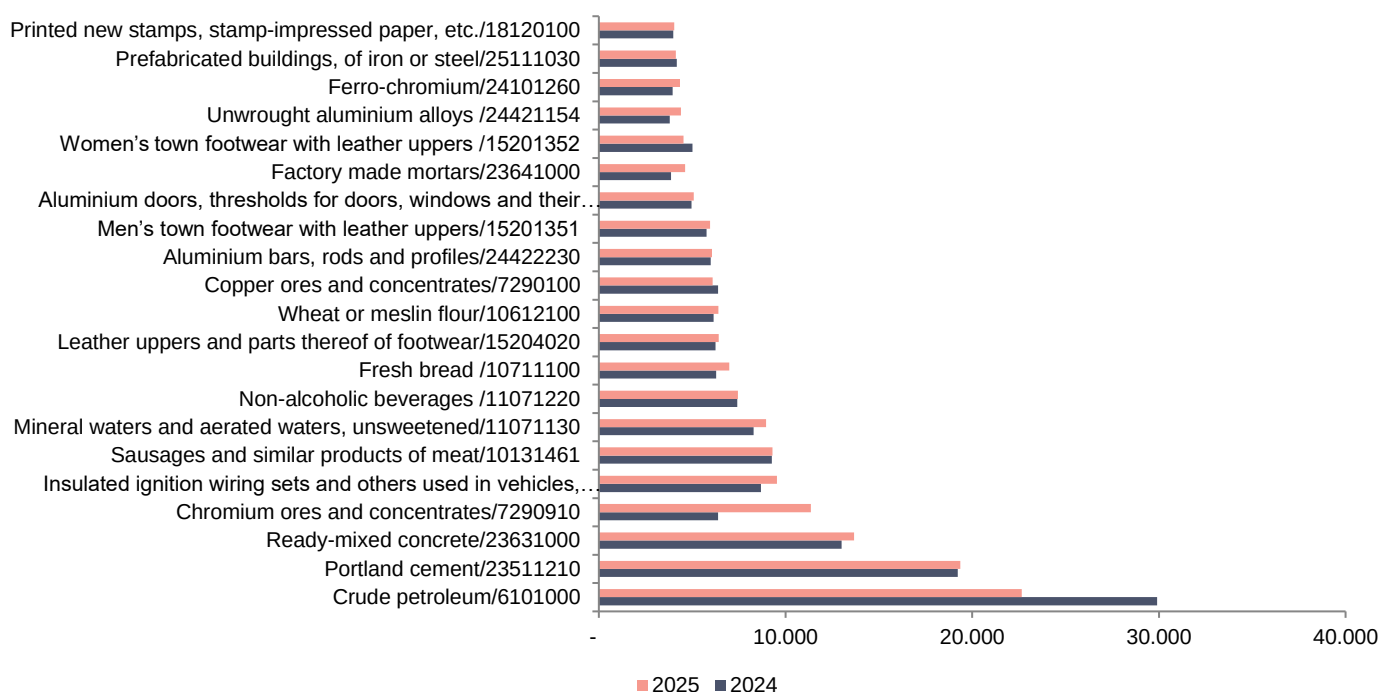

Based on the sales value of industrial products, according to the division of economic activities, NACE Rev. 2.1, the Manufacture of food products holds the largest share in sales value at 16.4 %, followed by the Manufacture of other non-metallic mineral products at 14.4 %, and the Manufacture of basic metals at 8.4 %.

Division of economic activities according to NACE Rev.2.1

- 06 - Extraction of crude petroleum and natural gas
- 07 - Mining of metal ores
- 08 - Other mining and quarrying
- 10 - Manufacture of food products
- 11 - Manufacture of beverages
- 12 - Manufacture of tobacco products
- 13 - Manufacture of textiles
- 14 - Manufacture of wearing apparel
- 15 - Manufacture of leather and related products of other materials
- 16 - Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials
- 17 - Manufacture of paper and paper products
- 18 - Printing and reproduction of recorded media
- 20 - Manufacture of chemicals and chemical products
- 21 - Manufacture of basic pharmaceutical products and pharmaceutical preparations
- 22 - Manufacture of rubber and plastic products
- 23 - Manufacture of other non-metallic mineral products
- 24 - Manufacture of basic metals
- 25 - Manufacture of fabricated metal products, except machinery and equipment
- 26 - Manufacture of computer, electronic and optical products
- 27 - Manufacture of electrical equipment
- 28 - Manufacture of machinery and equipment n.e.c.
- 29 - Manufacture of motor vehicles, trailers and semi-trailers
- 30 - Manufacture of other transport equipment
- 31 - Manufacture of furniture
- 32 - Other manufacturing
- 33 - Repair, maintenance and installation of machinery and equipment

Note to users:

- Detailed data by main industrial products are available on the INSTAT website, under the section: [Industrial Products Survey \(PRODCOM\)](https://www.instat.gov.al/Industrial-Products-Survey-PRODCOM).
- In accordance with the Error Treatment Policy, INSTAT promptly corrects any errors identified in published official statistics. Users are informed immediately and transparently of the corrections and resulting changes, in line with the principles of impartiality, transparency and quality of official statistics. The full Error Treatment Policy is available at: <https://www.instat.gov.al/media/9577/politika-e-traqitimit-te-gabimeve.pdf>.

METHODOLOGY

The Industrial Production Survey (PRODCOM) is an annual survey conducted by INSTAT, with the aims of collecting and producing statistics on the production and sale of industrial products carried out by enterprises operating in the Republic of Albania. The industrial product term include both physical products and industrial services.

PRODCOM mainly covers mining and quarrying, and manufacturing activities, and is based on the PRODCOM List, a harmonized classification at the european level detailed at the 8-digit level.

The data are reported according to the PRODCOM List, a harmonized list published annually by Eurostat. For the reference year 2025, the PRODCOM 2025 List has been applied, which includes changes in product codes and descriptions, as well as the transition from the NACE Rev. 2 to NACE Rev. 2.1 classification. For comparability and time-series analysis purposes, the 2024 data have also been classified according to the same PRODCOM List 2025. PRODCOM statistics are compiled in accordance with Regulation (EU) 2019/2152 on European Business Statistics (EBS) and Implementing Regulation (EU) 2020/1197, as well as the implementing act for the PRODCOM List of the respective year.

Definitions of basic variables:

The following Prodcom variables are available:

Actual production: This includes any production that is carried out. It covers products which are intended for sale, processed into another product, fitted into another product, or put into stock.

Sold production refers to the production produced by the enterprise during a certain period of time and sold during the reference year, regardless the time of production.

Sales Value refers to the invoiced amount from the sale of industrial products during the reference year, excluding value added tax.

The use of Eurostat's harmonized classifications and definitions ensures international comparability of PRODCOM statistics. Changes in NACE, CPA, and the PRODCOM List may affect the time-series comparability of certain products and should be taken into account when interpreting the series.
