Note to users:

Detailed monthly and annual data are available in the INSTAT statistical database under the section: Transport and Accidents.

Methodology

The purpose of the monthly publication of road accidents is to present the results and indicators of road accidents, such as the change in the number of monthly accidents, the number of persons killed and injured, classified by gender, the behavior of road users, age groups, and counties in the country, compared with the same period a year ago. The General Directorate of State Police is the institution that provides INSTAT with a comprehensive system of information on road accidents.

Definitions

Accidents: Unwanted or unintended sudden events, or a specific chain of such events, which have harmful consequences.

Injury accident: Any accident involving at least one road vehicle in motion on a public or private road accessible to the public, resulting in at least one injured or killed person.

Person killed: Any person who dies immediately or within 30 days as a result of the accident, excluding suicides.

Person injured: Any person who, as a result of an accident, was not killed immediately or did not die within 30 days, but sustained an injury requiring medical treatment, excluding attempted suicides.

Driver behavior: Refers to accidents that occur when the driver does not comply with traffic rules according to the "Road Code," such as sudden braking, ignoring traffic signs, exceeding the speed limit, etc.

Pedestrian behavior: Refers to accidents that occur when the pedestrian does not comply with traffic rules according to the "Road Code," such as crossing the road carelessly, etc.

Source of data: The data are provided by the Ministry of Internal Affairs / General Directorate of State Police.
Data for the last month on persons killed in road accidents are preliminary and subject to revision. For more information, see the Statistical Revision Policy.

Explanation of symbols:

- 0 – value less than half of the unit of measure
- no value – data not available
- (…) – missing data
