<b>1. Contact</b>	
1.1. Contact organisation	Institute of Statistics, INSTAT
1.2. Contact organisation unit	Livestock and Fisheries Statistics Sector, Directorate of Agriculture and Environmental Statistics
1.3. Contact name	Erinda Sulstarova
1.4. Contact person function	Head of Sector, Livestock and Fisheries Unit
1.5. Contact mail address	St. Vllazën Huta, Building 35, Entrance 1, Tirana, ZIP Code 1017 Tirane
1.6. Contact email address	<a href="mailto:esulstarova@instat.gov.al">esulstarova@instat.gov.al</a>
1.7. Contact phone number	+(355) 4 2222411 / 240
1.8. Contact fax number	+(355) 4 228300
<b>2. Metadata update</b>	
2.1. Metadata last certified	24.06.2026
2.2. Metadata last posted	24.06.2026
2.3. Metadata last update	24.06.2026
<b>3. Statistical presentation</b>	
3.1. Data description	Livestock statistics provide detailed information on the number of animals by species and categories (cattle, sheep, goats, pigs, equities, poultry and hives). Livestock products include milk production by categories of cow, sheep and goats. Other livestock products include the production of wool, eggs and honey.
3.2. Classification system	The classification used in Livestock Statistics refers to the classifications and definitions under the relevant EU regulations. <ul style="list-style-type: none"> <li>• <a href="#">Regulation (EC) No 1165/2008</a> concerning livestock and meat statistics;</li> </ul>

	<ul style="list-style-type: none"> <li>• <a href="#">COMMISSION REGULATION (EC) No 1242/2008</a> on Typology for Agricultural Holdings;</li> <li>• <a href="#">NACE Rev.2</a> - Statistical classification of economic activities.</li> </ul>
3.3. Sector coverage	<p>Statistical information is collected by the Agricultural Economic Units operating in the following activities:</p> <ul style="list-style-type: none"> <li>• Section A - Agriculture, orchards and fisheries - Group: 01.4 Livestock;</li> <li>• Section C - Group 10.1: Manufacture and processing of meat and meat-based products.</li> </ul> <p>This information covers data on the number of heads and livestock products in the territory of the Republic of Albania.</p>
3.4. Statistical concepts and definitions	<p>Livestock and poultry cover all animals irrespective of their age, location or purpose for breeding. Animals may be present in the Agricultural Economic Unit, or outside of farmland in pasture.</p> <p><b>Agricultural and livestock holding</b> means a single unit, both technically and economically, under a single management and breeds animals as listed below:</p> <p><b>Cattle:</b> refers to domestic animals of the species <i>Bos Taurus</i> and <i>Bubalus bubalis</i>, including the hybrid race as Beefalo.</p> <p><b>A pig:</b> is a domesticated animal of the species <i>Sus scrofa domestica</i>. A distinction is made between pigs, piglets, fattening pigs and breeding pigs.</p> <p><b>Sheep:</b> are domesticated animals of the species <i>Ovis aries</i> kept in flocks mainly for their wool or meat.</p> <p><b>Goat:</b> in the context of European Union (EU) statistics, refers to domestic animals of the subspecies <i>Capra aegagrus hircus</i>.</p> <p><b>Poultry:</b> in the context of European Union (EU) statistics, refers to domestic birds of the species: <i>Gallus gallus</i> (hens and chickens), <i>Meleagris</i> spp. (turkeys), <i>Anas</i> spp. and <i>Cairina moschata</i> (ducks), <i>Anser anser dom.</i> (geese), <i>Coturnix</i> spp. (quails), <i>Phasianus</i> spp. (pheasants), <i>Numida meleagris dom.</i> (guineafowl), <i>Columbinae</i> spp. (pigeons), <i>Struthio camelus</i> (ostriches). It excludes, however, birds raised in confinement for hunting purposes and not for meat production.</p> <p><b>Meat live weight production:</b> The estimate for the production of meat live weight is carried out for each type of animals. Calculation of meat live weight production is based on the calculations made by the livestock movement, i.e. in the number of culled cattle, sheep, goats, pigs, and poultry by slaughtering categories, and the average live weight for slaughtered heads by type and categories of slaughter.</p>

	<p><b>Milk production:</b> Milk production includes milk from: cows, sheep and goats. Milk production includes all milk produced exclusively for human consumption or for the production of milk products such as cheese, butter, yoghurt in farm or dairies. Milk which is milked by hand or milking machine and given to calves is included in milk production.</p> <p><b>Note:</b> The milk that calves suckle directly from the cows is not included in milk production. This is calculated as a gain meat live weight.</p> <p><b>Egg production:</b> included eggs that are produced for human consumption are included. Eggs produced in agricultural units, poultry farms and those from Agro-industry are all included.</p> <p><b>Honey production:</b> includes all the honey produced by each hive.</p> <p><b>Wool production:</b> includes wool produced from sheep and goats.</p>
3.5. Statistical unit	The observation unit is the Agricultural Household (AH).
3.6. Statistical population	The data on the number of heads and livestock production are collected from all Agricultural Households (AH) which focus on animal breeding.
3.7. Reference area	Livestock statistics cover the entire territory of the Republic of Albania.
3.8. Time coverage	Statistical data on Number of Heads date back to 2001, while Livestock Production dates back to 2004.
3.9. Base period	Not applicable.
<b>4. Unit of measure</b>	
4.1 Unit of measure	The measuring unit used are tons and number of heads.
<b>5. Reference period</b>	
5.1 Reference period	The Reference Period for Livestock Products starts from 01 December 2024 - 30 November 2025. For the Number Heads the reference period is only 1 day of the year, the reference day is 01 December 2025.
<b>6. Institutional mandate</b>	
6.1. Legal acts and other agreements	The legal basis for collecting agricultural and livestock statistics are: <ul style="list-style-type: none"> <li>• <a href="#">Law No.17/2018 on Official Statistics;</a></li> </ul>

	<ul style="list-style-type: none"> <li>• <a href="#">Official Statistics National Programmer 2022-2026</a>;</li> <li>• <a href="#">Regulation (EC) No 1165/2008</a> “Concerning livestock and meat statistics”; Classifications and definitions according to relevant EU regulations.</li> </ul> <p>Classifications and definitions according to relevant EU regulations.</p> <ul style="list-style-type: none"> <li>• <a href="#">Regulation (EC) No 1165/2008</a> “Concerning livestock and meat statistics”;</li> <li>• <a href="#">COMMISSION REGULATION (EC) No 1242/2008</a> on Typology for Agricultural Holdings;</li> <li>• <a href="#">NACE Rev.2</a> - Statistical classification of economic activities.</li> </ul>
6.2. Data sharing	Livestock statistics are transmitted to Eurostat via eDAMIS platform.
<b>7. Confidentiality</b>	
7.1. Confidentiality - policy	<p>The data collected are considered as strictly confidential and used only for statistical purposes and scientific research in accordance with the national Statistical Law No.17/2018 “On Official Statistics”, date 10.03.2018 and the <a href="#">Law No. 124/2024 on the Protection of Personal Data</a> Article 31 of the Law on Official Statistics clearly define that all statistical information collected by INSTAT are confidential and may only be used or published in such summary tables that do not identify the information of the unit. The direct identification is called when a statistical unit is directly identified by the name, address or any officially recognized identification number. When data processing is performed in such a way as to enable the data subject to be identified, the data must be coded immediately so that the entities are no longer recognized.</p>
7.2. Confidentiality - data treatment	<p>Albanian Institute of Statistics protects and does not disseminate data it has obtained or it has access to, which enable the direct or indirect identification of the statistical units. Albania Institute of Statistics takes all appropriate preventive measures so as to render impossible the identification of individual statistical units by technical or other means that might reasonably be used by a third party. Statistical data that could potentially enable the identification of the statistical unit are disseminated by Albania Institute of Statistics if and only if:</p> <ol style="list-style-type: none"> <li>a) these data have been treated, as it is specifically set out in the Regulation, in such a way that their dissemination does not prejudice statistical confidentiality or</li> <li>b) the statistical unit has given its consent, without any reservations, for the disclosure of data.</li> </ol> <p>The confidential data that are transmitted to Albania Institute of Statistics are used exclusively for statistical purposes and the only persons who have the right to have access to these data are the personnel engaged in this task. Issues referring to the observance of statistical confidentiality are examined by the staff</p>

	working in Albania Institute of Statistics. The responsibilities of this staff are to recommend on: which detailed level the statistical data can be disseminated, so as the identification, either directly or indirectly, of the surveyed statistical unit is not possible; the anonymization criteria for the microdata provided to users; the access granting to researchers on confidential data for scientific purposes.
<b>8. Release policy</b>	
8.1. Release calendar	Notifications about the dissemination of statistics are published in the release calendar, which is available on the website. The announcements and delays are pre-announced in this calendar. In case of delays, the date of future publication must be specified, as well as the reasons for the delay.
8.2. Release calendar access	<a href="#">The Calendar of publications</a> is available on INSTAT website.
8.3. User access	<p>In accordance with article 34 of Law No. 17/2018 "On Official Statistics", official statistics are disseminated so that all users have an immediate and equal right and all possible forms of media are used. INSTAT and statistical agencies, having in the program the responsibilities of dissemination, seek to meet every requirement of any organization or individual for unpublished data or specific analysis. The following dissemination channels are used to release the results:</p> <ul style="list-style-type: none"> <li>• <a href="#">Website</a> – online release;</li> <li>• Written requests;</li> <li>• Publication:</li> <li>• <a href="#">Data request</a>, section available for external users.</li> </ul>
<b>9. Frequency of dissemination</b>	
9.1 Frequency of dissemination	Livestock statistics are published on annual basis.
<b>10. Accessibility and clarity</b>	
10.1. News release	The press release contains information such as: cattle, poultry, milk etc. The format of press release is defined by publication sector as well as the date of release. The Livestock Press Release is published online on the INSTAT website.
10.2. Publications	Results for Livestock Statistics are published in the publication " <a href="#">Livestock Statistics</a> ".
10.3. Online database	All the information is available in both Albanian and English language. Since 2011, the information is provided to external users in web through the Pc-Axis

	system. A short methodological explanation exists also in the web page. You can access the database on the section <a href="#">Statistical Database</a> .
10.4. Micro-data access	Data on Livestock Statistics are administrative data, and as such the most detailed level of data obtained is at municipality level. Therefore, INSTAT does not have available data on Livestock Statistics at micro level.
10.5. Other	Users can send other specific requests through a dedicated section for <a href="#">Contacts</a> .
10.6. Documentation on methodology	A short explanation related to the definitions of the main concepts and methodological explanations are provided to users in the end of press releases and publications. Additional support information is given to internal users when needed or required. Also the <a href="#">methodological</a> on Livestock Statistics notes are published at INSTAT's website.
10.7. Quality documentation	The Sector of Livestock and Fisheries documents all processes and procedures used for calculations related to Livestock statistics for internal purposes.
<b>11. Quality management</b>	
11.1. Quality assurance	INSTAT is committed to ensure the highest quality with respect to the compilation of statistical information. In accordance with the <a href="#">National Statistical Law No.17/2018 on Official Statistics</a> , INSTAT use statistical methods and processes in compliance with internationally recognized scientific principles and standards conduct ongoing analyses of the statistics with a view to quality improvements and ensure that statistics are as up to-date. In performing its tasks, it follows the general principles of quality management from the <a href="#">European Statistics Code of Practice</a> . INSTAT declares that it takes into account the following principles: impartiality, quality of processes and products, user orientation, employee orientation, effectiveness of statistical processes, reducing the workload for respondents. Quality controls and validation of data are actions carried out throughout the process. The staffs is involved in different stages of index calculation, such as the data collection, data control, data input and other necessary control are all well trained. This helps the staff to know the enterprises and their responsibilities and keep an updated collaboration.
11.2. Quality assessment	Livestock data are collected on the number of livestock breeding farmers and livestock products. Extension specialists collect data to compare with data from the veterinary service that performs matriculation and vaccination of animals. The veterinary service carries out inventory of animals at the commune level at the time of vaccination. Extension specialists also have relationships with private veterinarians. These veterinarians perform various services privately to farmers (such as disease control, animal death or birth, slaughter, vaccination, etc.). In the end, extension specialists compare data from all three sources. Extension

	<p>specialists also collect data on agricultural and livestock products from farmers. Product yield data is collected from the most representative farms at the municipal level. The data collected is sent to the Ministry of Agriculture and Rural Development, where livestock specialists make assessments comparing field data collected with farm data over the years.</p>
<p><b>12. Relevance</b></p>	
12.1. User needs	<p>Users of Livestock Statistics are divided into internal and external users.</p> <p>External users:</p> <ul style="list-style-type: none"> <li>• Public administration institutions;</li> <li>• Universities;</li> <li>• National and international non-profit organizations;</li> <li>• Businesses;</li> <li>• Researchers, students and other similar groups.</li> </ul> <p>Internal users are those within INSTAT who use Livestock Statistics as input for their work</p>
12.2. User satisfaction	<p>INSTAT conducts the User Satisfaction Survey annually, and its results are published on the website at the following link: <a href="#">User Satisfaction Survey</a></p>
12.3. Completeness	<p>The completeness of Livestock statistics and livestock product for 2025 is judged by comparing the quality and quantity of indicators covered by INSTAT with those required by the regulations followed.</p> <p>The level of completeness of the indicators at the aggregated level is in full compliance with the regulation: “REGULATION (EC) No 1165/2008”, and as such all indicators required by EUROSTAT are reported. The detailed level of these indicators produced by INSTAT is realized through expert evaluation methods in the field.</p>
<p><b>13. Accuracy and reliability</b></p>	
13.1. Overall accuracy	<p>Information on Livestock Statistics is collected from administrative sources, subject to enforcement of the legal basis and applicable Memorandums of Understanding.</p> <p>Overall, data have been searched with previous years to identify any significant changes in data performance. In case of changes, INSTAT notifies the MARD and sector inside INSTAT to put to knowledge of the changes that had been found to realize the correction of this data.</p>
13.2. Sampling error	<p>Not applicable because the data are administrative.</p>

13.3. Non-sampling error	The non-sampling errors are mainly errors of the administrative data sources reported data. Data review occurs only if the relevant institutions review the data sent to INSTAT for the purpose of updating or any potential human error. If the relevant institutions review the data sent to INSTAT, these changes will be reflected in the nearest publication and brief explanatory information will be provided to users.
--------------------------	--

#### 14. Timeliness and punctuality

14.1. Timeliness	Results of Livestock Statistics are published on INSTAT website (T+206 days) and (T+205 days) after the end of the reference period. The following are considered two different reference periods for the relevant areas on which these results are based.															
	<table border="1"> <thead> <tr> <th>Livestock Statistics</th> <th>Statistical domain</th> <th>Reference period</th> <th>Date of publication</th> <th>Timeliness</th> </tr> </thead> <tbody> <tr> <td></td> <td>Livestock Products</td> <td>11/30/2025</td> <td>6/24/2026</td> <td>206</td> </tr> <tr> <td></td> <td>Number of Heads</td> <td>12/1/2025</td> <td>6/24/2026</td> <td>205</td> </tr> </tbody> </table>	Livestock Statistics	Statistical domain	Reference period	Date of publication	Timeliness		Livestock Products	11/30/2025	6/24/2026	206		Number of Heads	12/1/2025	6/24/2026	205
Livestock Statistics	Statistical domain	Reference period	Date of publication	Timeliness												
	Livestock Products	11/30/2025	6/24/2026	206												
	Number of Heads	12/1/2025	6/24/2026	205												

14.2. Punctuality	The data of Livestock Statistics are disseminated according to the publication calendar. The publication of Livestock Statistics has been punctuality in time to 100% of publications carried out over the time.																		
	<table border="1"> <thead> <tr> <th>Livestock Statistics</th> <th>Statistical domain</th> <th>Reference period</th> <th>Date of announcement</th> <th>Date of publication</th> <th>Time lag</th> </tr> </thead> <tbody> <tr> <td></td> <td>Livestock Products</td> <td>11/30/2025</td> <td>6/24/2026</td> <td>6/24/2026</td> <td>0</td> </tr> <tr> <td></td> <td>Number of Heads</td> <td>12/1/2025</td> <td>6/24/2026</td> <td>6/24/2026</td> <td>0</td> </tr> </tbody> </table>	Livestock Statistics	Statistical domain	Reference period	Date of announcement	Date of publication	Time lag		Livestock Products	11/30/2025	6/24/2026	6/24/2026	0		Number of Heads	12/1/2025	6/24/2026	6/24/2026	0
Livestock Statistics	Statistical domain	Reference period	Date of announcement	Date of publication	Time lag														
	Livestock Products	11/30/2025	6/24/2026	6/24/2026	0														
	Number of Heads	12/1/2025	6/24/2026	6/24/2026	0														

#### 15. Coherence and comparability

15.1. Comparability - geographical	Data on Livestock Statistics are all inclusive; they are produced at national level and by municipality level. Statistics are compared by geographical distribution and regionalization of livestock products.
------------------------------------	--

15.2. Comparability - over time	<p>Statistical data on Number of Heads date back to 2001 referring to the statistical database providing a comparability over time of 25 years (CC2=Jlast-Jfirst+1=25).</p> <p>While Livestock Production dates back to 2004 referring to the statistical database providing a comparability over time of 22 years (CC2=Jlast-Jfirst+1=22).</p> <p>The data are constantly checked to ensure their comparability over time.</p>
---------------------------------	---

15.3. Coherence - cross domain	Not applicable.
--------------------------------	-----------------

15.4. Coherence - internal	The internal consistency of the data is checked before being finalized. The relationships between variables and coherence across different series are also checked.
<b>16. Cost and burden</b>	
16.1 Cost and burden	The staff involved in the preparation of agricultural statistics at Livestock and Fisheries Sector is: 2 employ at the central offices of INSTAT, as livestock statistics data are provided by administrative sources of the Agriculture Directorates in the regions, in cooperation with the Statistics Sector at the Ministry of Agriculture and Rural Development.
<b>17. Data revision</b>	
17.1. Data revision - policy	<p>Revision policy is done in accordance with general revision policy and errors treatment policy introduced by INSTAT in the links below:</p> <ul style="list-style-type: none"> <li>• <a href="#">Revision policy;</a></li> <li>• <a href="#">The errors treatment policy.</a></li> </ul>
17.2. Data revision-practise	<p>If the authorities that send information on Livestock Statistics to INSTAT will report changes in the information provided through tables, this data will be updated and published in the forthcoming publication accompanied by an explanatory note to the user.</p> <p>No reviews of data on Livestock Statistics for 2025 have been conducted, subject to this report.</p>
<b>18. Statistical processing</b>	
18.1. Source data	For statistics on “Livestock Statistics” INSTAT uses information provided by: Ministry of Agriculture and Rural Development.
18.2. Frequency of data collection	Livestock Statistics data are collected on annual basis.
18.3. Data collection	The Institute of Statistics organizes the work for the calculation of livestock indicators and statistics for 2025, oriented by the Program of Official Statistics and the Law on Official Statistics. The Ministry of Agriculture and Rural Development is the main source of data for all indicators published under this program.
18.4. Data validation	The data were subjected to logical and mathematical checks. These checks are performed throughout the data processing process for all indicators that INSTAT

	publishes. Examples of administrative data verification methods include: Completeness check, consistency over time, arithmetic corrections (should not be too high), summary checks, time series check if there are large deviations, etc.
18.5. Data compilation	Livestock data are provided by administrative source, at country and municipality level. Statistical information is available on time.
18.6. Adjustment	Not applicable.
<b>19. Comments</b>	
<b>Annex</b>
