

Results on Industrial Production Survey - PRODCOM

Year 2024

Tiranë, September 26, 2025: INSTAT publishes the results on the Industrial Production Survey (PRODCOM) according to the Prodcom List detailed at an 8-digit level, which is used in the European Union countries. This survey is done with an annual frequency and covers all active enterprises which operate in mining and quarrying and manufacturing and aims to provide information on the production and sale of industrial products made by enterprises that carry out their economic activity in our country. These statistics serve to make analyses of industrial products produced in the country.

Production and sale of most important industrial products

During 2024 it is produced 716,435 tons of crude petroleum. The production of pig iron and steel reached the quantity of 343,925 tons, the production of chromium ores and concentrates reached the quantity of 588,047 tons, the production of cement reached the quantity of 1,944,140 tons. The production of non-alcoholic beverages and mineral and aerated waters was 6,215,967 hectolitres in 2024.

Tab. 1 Quantity and sales value of industrial products, 2023-2024

Procom List Code	Description of product	Measure unit	2023		2024	
			Actual production	Sales value (million ALL)	Actual production	Sales value (million ALL)
6101000	Crude petroleum	ton	891,400	39,280	716,435	29,903
24101100	Pig iron, steel, and iron in other primary forms	ton	474,444	33,116	343,925	20,229
23511210	Portland cement and other hydraulic cements	ton	2,176,865	19,387	1,944,140	19,219
7291910	Chromium ores and concentrates	ton	822,206	20,359	588,047	14,915
23631000	Ready-mixed concrete	ton	1,776,111	13,363	1,706,221	13,006
10131461	Sausages and similar products of meat	ton	12,537	9,055	13,081	9,265
29311000	Insulated ignition wiring sets of a kind used in vehicles	mln pieces	229,973	8,256	241,986	8,688
11071130	Mineral waters and aerated waters	hectoliter	3,826,723	6,295	4,984,900	8,293
11071950	Non-alcoholic beverages	hectoliter	1,208,574	6,926	1,231,067	7,419
7291100	Copper ores and concentrates	ton	268,441	3,660	466,219	6,386

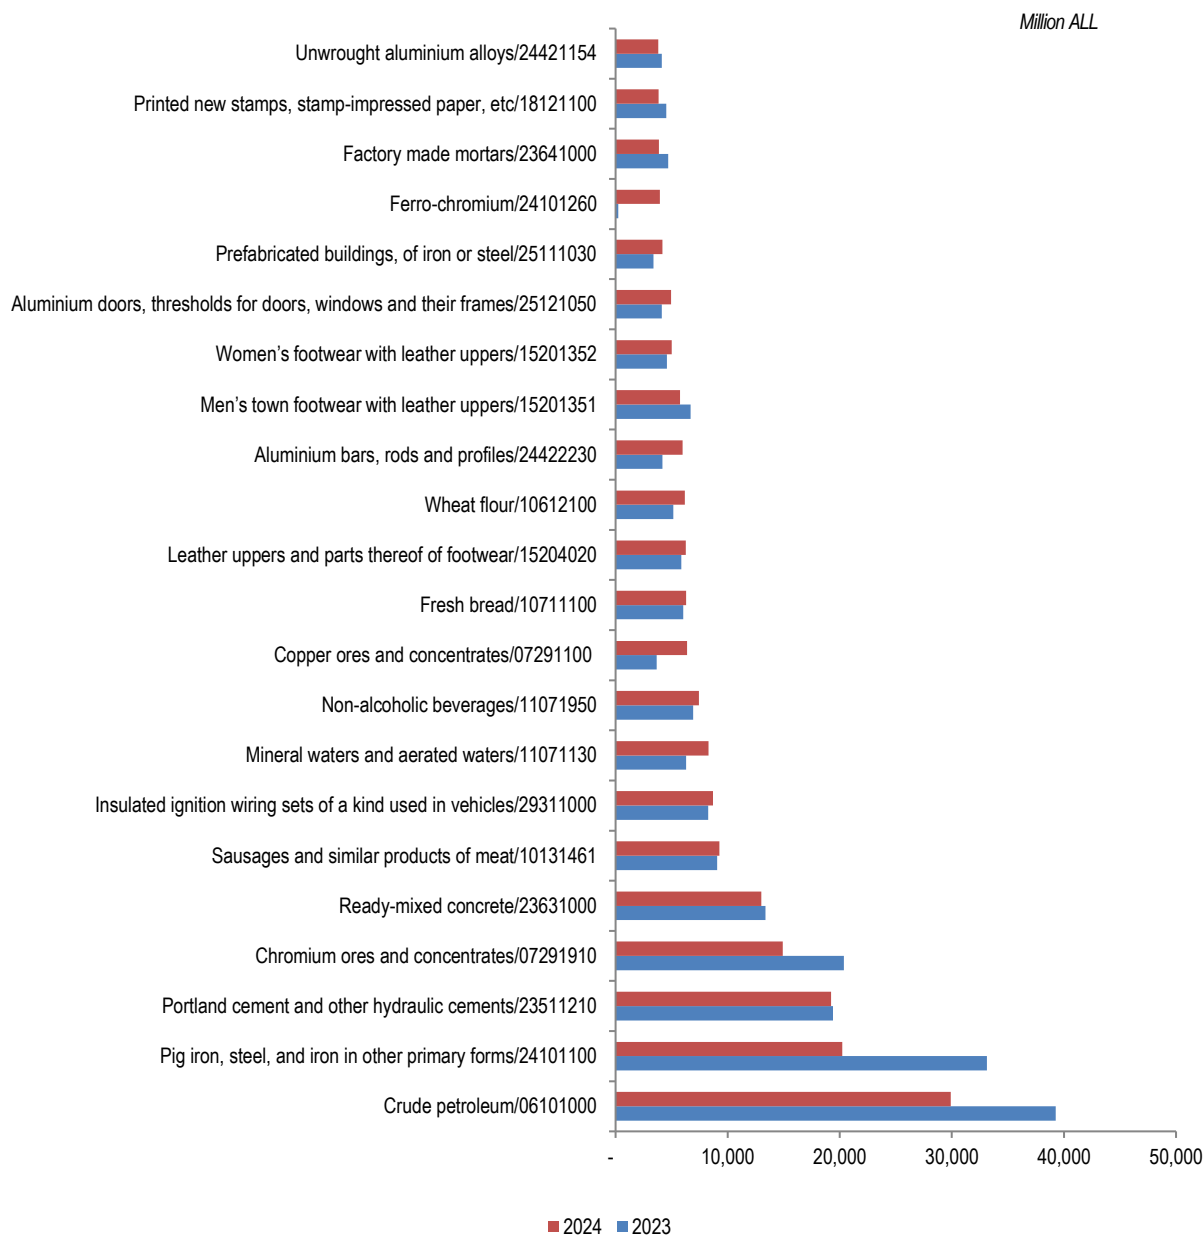

Note: Industrial products at 8-digit level do not necessarily represent all the amount of industrial products produced at economic activity level.

For release 26/09/2025

Continues

The sales value for the crude petroleum during 2024 was 29,903 million ALL, for the pig iron and steel was 20,229 million ALL, for the portland cement and other hydraulic cements was 19,219 million ALL, for the chromium ores and concentrates was 14,915 million. The sales value of non-alcoholic beverages and mineral and aerated waters was 15,712 million ALL in 2024.

Fig. 1 Sales value of industrial products, 2023-2024

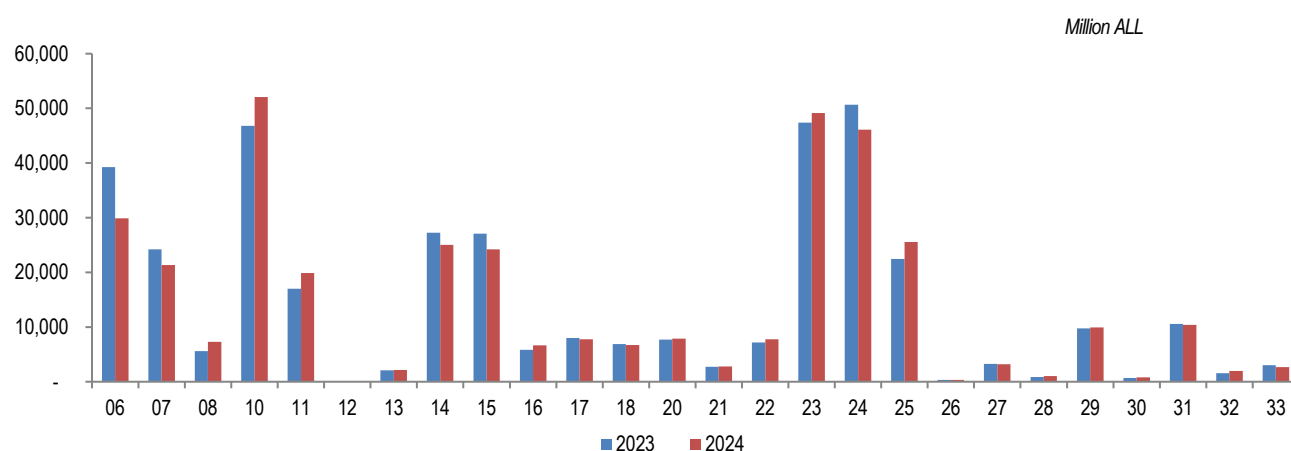

During 2024, manufacture of food products accounted for 14.0 % of the total sales value of industrial products, from 12.4 % in 2023.

Manufacture of other non-metallic mineral products accounted for 13.2 % of total sales in 2024, from 12.5 % in 2023, while the manufacture of basic metals accounted for 12.4 % of total sales in 2024 from 13.4 % in 2023.

The Figure 2 presents the sales value of industrial products, according to the divisions of Statistical Classification of Economic Activities Rev.2 (NACE Rev.2).

Fig. 2 The sales value of industrial products, according to the division of economic activities

Division of economic activities according to NACE Rev.2

- 06 - Extraction of crude petroleum
- 07 - Mining of metal ores
- 08 - Other mining and quarrying
- 10 - Manufacture of food products
- 11 - Manufacture of beverages
- 12 - Manufacture of tobacco products
- 13 - Manufacture of textiles
- 14 - Manufacture of wearing apparel
- 15 - Manufacture of leather and related products
- 16 - Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials
- 17 - Manufacture of paper and paper products
- 18 - Printing and reproduction of recorded media
- 20 - Manufacture of chemicals and chemical products
- 21 - Manufacture of basic pharmaceutical products and pharmaceutical preparations
- 22 - Manufacture of rubber and plastic products
- 23 - Manufacture of other non-metallic mineral products
- 24 - Manufacture of basic metals
- 25 - Manufacture of fabricated metal products, except machinery and equipment
- 26 - Manufacture of computer, electronic and optical products
- 27 - Manufacture of electrical equipment
- 28 - Manufacture of machinery and equipment n.e.c.
- 29 - Manufacture of motor vehicles, trailers and semi-trailers
- 30 - Manufacture of other transport equipment
- 31 - Manufacture of furniture
- 32 - Other manufacturing
- 33 - Repair and installation of machinery and equipment

Methodology

The Industrial Production Survey (PRODCOM) is an annual survey, which purpose is to collect and produce statistics on the production and sale of industrial products carried out by enterprises in the Republic of Albania. The industrial product term refers to both products that have a physical dimension and industrial services.

PRODCOM survey covers all active enterprises which operate in Mining and quarrying and Manufacturing, respectively sections B and C of the Statistical Classification of Economic Activities in the European Union (NACE Rev. 2). This survey is based on a statistical classification (Prodcom List) containing about 4000 different types of products. The Prodcom list is detailed at the 8-digit level and is used in European Union countries. Industrial products at an 8-digit level do not necessarily represent all the amount of industrial products produced at economic activity level.

Structural business statistics are published according to the European Commission regulations:

- EU regulation 2019/2152 on European business statistics (EBS);
- EU implementing regulation 2020/1197 on technical specifications and arrangements for European business statistics;
- Classification of PRODCOM (Prodcom List) which is created through a separate Implementing Regulation.

Definitions of basic variables:

Actual production (in units of measurement as defined in the Prodcom List) refers to the production produced by the enterprise during the reference year.

Sold production (in units of measurement as defined in the Prodcom List) refers to the production produced by the enterprise during a certain period of time and sold during the reference year, regardless the time of production.

Sales Value refers to the invoiced amount from the sale of industrial products during the reference year, excluding value added tax.
